Strategies and mechanisms for enhancing receptor-specific TRAIL-induced apoptosis

Xinyu Zhou

The research described in this thesis was carried out in the Department of Chemical and Pharmaceutical Biology (Groningen Research Institute of Pharmacy, University of Groningen, The Netherlands) and was financially supported by the China Scholarship Council, the European Fund for Regional Development (KOP/EFRO) (grants 068 and 073), and the Dutch Technology Foundation (STW) (grant 11056).

The research work was carried out according to the requirements of the Graduate School of Science, Faculty of Science and Engineering, University of Groningen, the Netherlands.

Printing of this thesis was financially supported by the University Library and the Graduate School of Science, Faculty of Science and Engineering, University of Groningen, the Netherlands.

ISBN: 978-94-6458-339-7

Strategies and mechanisms for enhancing receptor-specific TRAIL-induced apoptosis

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Monday 13 June 2022 at 9.00 hours

by

Xinyu Zhou

born on 31 May 1991
in Hebei, China

Supervisor

Prof. W.J. Quax

Co-supervisor

Dr. K. Haslinger

Assessment Committee

Prof. K. Poelstra

Prof. P. Olinga

Prof. R.J. Kok

Contents

Chapter 1	Introduction and scope of the thesis	7
Chapter 2	Receptor specificity engineering of TNF superfamily ligands	15
Chapter 3	Artemisinin derivatives stimulate DR5-specific TRAIL-induced apoptosis by regulating wildtype P53	47
Chapter 4	Dihydroartemisinin-transferrin adducts enhance TRAIL-induced apoptosis in triple-negative breast cancer in a P53-independent and ROS-dependent manner	75
Chapter 5	Artemisinin-type drugs in tumor cell death: mechanisms, combination treatment with biologics and nanoparticle delivery	103
Chapter 6	Ionizing radiation induces opposite effects on DR4-specific and DR5-specific TRAIL signaling in 3D tumor spheroids	141
Chapter 7	Summary and future perspective	159
	Nederlandse samenvatting	168
Appendix	Acknowledgments	177
	List of publications	183
	About the author	184
