Stellingen

Behorende bij het proefschrift

Metabolomics and bioanalysis of terpenoid derived secondary metabolites:

Analysis of Cannabis sativa L. metabolite production and prenylases for cannabinoid production

Remco Muntendam

2015

1)

Voor gedegen onderzoek aan cannabis is een gestandaardiseerde cultivatie en nauwkeurige classificatie van het product van belang.

-This thesis

2)

De vele positieve en negatieve claims aan het gebruik van cannabis moeten met een korrel zout genomen worden zolang stelling 1 niet nageleefd wordt.

-This thesis

3)

Fysici zouden het cannabis beleid in Nederlands eens moeten bestuderen als bron van eeuwige energie. In theorie mag er niks binnenkomen, terwijl er constant wat de deur uitgaat.

-This thesis

4)

Het achterstellen van het eigen belang aan de wetenschap zal de integriteit van het onderzoek ten goeden komen.

-This thesis

5)

Collaboration is the future; maar samenwerken in het heden is belangrijker.

-This thesis

6)

Procrastination is mostly the result of mastering the art of priority management incorrectly.

-This thesis

7)

You do not need to finish first, as long as you know how to reach it and enjoy your journey.

-Adapted from: "no hay que llegar primero, sino saber llegar" ' Leta El Rey'

8)

The secret for scientists to keep their motivation and excitement in their work is to carry the spirit of the child into old age or put in different words; never lose your enthusiasm.

-Adapted from Aldous Huxley

9)

Although often perceived as such, criticism on your work is not a bad thing. It makes you observe your own results from a different perspective and teaches you. However when criticism is replaced by cynicism and negativism, keep in mind that that person went from knowing nothing to believing nothing.

-Adapted from Maya Angelou
