Acknowledgements

This book in your hands marks the end of an exciting four-year journey, which for me was not only about science, but also about growing as a person. I met many wonderful people, saw many places and learned a lot of science, but also learned much about myself and how I want to relate to others. Most importantly, I am very happy to find out that I can be myself, and it was great to find out that that people in my surroundings supported me, far beyond what I had hoped for. Without their support, this thesis might still have been work in progress.

This journey would of course never have occurred without my promotor, Amina. Thank you for your enduring support and patience, even when I was stubborn or could not believe you were actually right. During the Milky Way course you showed the beautiful 'Field of Streams' image, and I was intrigued by the topic of stellar streams. When you offered me a PhD position I was happy to be able to go a lot deeper into this subject. You helped me to be more critical, and taught me when to be persistent and go into detail, and when to move on. I have seldomly met a person as organised as you, and your effort to see every student in your group once a week personally and also in our group meetings greatly benefited my progression. Your advice helped me to balance my workload and successfully make it to the finish.

I am very grateful to all my colleagues and friends, whom I could rely on when the pressure was high and the road seemed endless, and I always enjoyed the many interesting discussions during breaks. In the following sections I will try to mention several people, but undoubtedly I will forget many, so please do not feel offended if I do indeed forget to mention anyone.

Eva, your enthusiasm and support helped me a lot to get through the last period. We spent quite some hours in the swimming pool and talked a lot about our experiences in life. That this led some people to think we were romantically involved made it rather amusing. Maarten, I bugged you with so many programming issues, yet you were always willing to help. I also enjoyed a lot your stories on the projects you were planning in and around your house. Robyn, I recall well when you moved into our office and how you started to blossom in our institute. It was really great how you helped me with my project. I also have good memories of the Galactic Dynamics 'bible study group', which was a great way to deepen our knowledge on the subject. Patrick, your advice and compliments helped me a lot at several crucial moments, and I greatly value your idealism. Tjitske, I really enjoyed your practical thinking and the useful advice I got from

you. Shoko, thank you very much for helping me improve my English, and your effort to find the most delicious cheese and gifts for my birthday. Giacomo, I highly appreciated your love for music and your refreshing view on politics. Scott, thanks for some crucial advice and the many times you addressed important issues for the institute and your experience with living in the Netherlands. Gergő, it amazes me how well you manage your science, and I hope to play Galaxy Trucker with you and Anke some time. Burçu, Ellen, Hennie, Jorien, Marlies and Scott, thank you for the many cakes and dishes I tasted from you, and for the many new recipes and tricks! Steven-kun and Robin-kun, I hope you have a great time, whether in Japan or elsewhere! Harish, I don't remember how we got into the 'Greetings earthling'-thing, but the question of what I am remains, given that I call you an earthling.

I also specially want to mention here the members and several guests of Amina's group over the years: Berenice, Carlos, Casper, Else, Giacomo, Hao, Johanna, Jorrit, Jovan, Kyle, Maarten, Manolis, Martín, Pim, Robyn, Santi, Shoko, Tjitske and Teresa. We had many nice discussions about science, sometimes accompanied by the pleasures of refreshing cocktails. I also want to mention Eite, Martin, Valentin and Wim from the computer support, whom I troubled quite a few times with hardware and software issues. A special mention goes to the supporting role by the PBC, in particular to Eline. And I should not forget my office mates, who endured it all the way: Andrea, Elaheh, Koshy, Robyn, Rosina, Sarrvesh and Nadine. I highly appreciated your company, and your patience when I had new ideas on how the office should look... sorry Koshy!

The secretarial support by Christa, Hennie, Gineke, Jackie and Lucia was also crucial for me, and the institute. Hennie, your advice helped me a lot, and the dinner at your place was delicious. I hope we will do some follow-ups soon. Jackie, I'm happy to see you are enthusiastically organising the Jan Modderman lezing, and I hope to be able to join a lecture soon! Hennie and Inga, I really enjoyed your managing of the Dutch Astronomy Conference, and our explorative visit to Ameland. Job, Keimpe, Laurens-Jan and Paula, it was a pleasure to organise the Hendrik de Waard lectures with you, and to put extra spirit into the organisation. Finally, life at the Kapteyn Institute would not have been as much fun without (but not limited to) Chiara, Hugo, Huug, Jarno, Jeffrey, Johan, Jouke, Leon, Mariano, Manu, Marius, Matthijs, Niels, Piet, Rien, Robin, Saleem, Sander, Sandra, Stephan, Thomas, Veronica and many others.

Helena, bedankt voor de vele gezellige avonden en die ene avond waarop we allebei wat nieuws hadden te vertellen. Arie, jouw enthousiasme is onnavolgbaar, en ik dank je nog steeds voor de ervaring in Berlijn en het advies jouw cursus in Groningen te volgen om een kijkje in jouw wereld te krijgen. Pieter en Dieuwertje, Michael en ik vonden het heel leuk dat we op jullie bruiloft mochten zijn, en ik wil zeker nog eens terug naar Dopersduin. En ik dank Muziekvereniging Concordia en de Protestantse gemeente Roden-Roderwolde, vooral dankzij de leden die me daar thuis doen voelen.

Lieve familie, bedankt voor jullie onafgebroken steun tijdens deze vier jaar en daarvoor op zo vele manieren. Pappa, Mamma, Opa, Karin, Gertjan, Maarten, Leanne en Marijn en de rest, heel erg bedankt dat jullie me hebben geaccepteerd toen ik met Michael aankwam. En Mamma, bedankt voor de prachtige cover! Michael, ik ben heel erg blij dat wij elkaar gevonden hebben. Ik waardeer je engelengeduld met mij en de vele bezoeken aan Aken en in Keulen bij je familie. Zonder jouw steun was ik hier vast nooit gekomen, en samen de ervaringen van het leven delen is een stuk leuker!

Hans Buist
