Table of contents

Chapter 1	Introduction	9
Part I	Developments in primary percutaneous coronary intervention after acute myocardial infarction	19
Chapter 2	Impact of thrombus burden in ST-segment elevation myocardial infarction patients <i>Submitted</i>	21
Chapter 3	Intracoronary versus intravenous abciximab in ST-segment elevation myocardial infarction: rationale and design of the CICERO trial in patients undergoing primary percutaneous coronary intervention with thrombus aspiration <i>Trials 2009;10:90</i>	37
Chapter 4	Intracoronary versus intravenous administration of abciximab in patients with ST-segment elevation myocardial infarction undergoing primary percutaneous coronary intervention with thrombus aspiration: the comparison of intracoronary versus intravenous abciximab administration during emergency reperfusion of ST-segment elevation myocardial infarction (CICERO) trial <i>Circulation 2010;122:2709-2717</i>	53

PART II	Prognosis after acute myocardial infarction in routine clinical practice	75
Chapter 5	Is the myocardial blush grade scored by the operator during primary percutaneous coronary intervention of prognostic value in ST-elevation myocardial infarction patients in routine clinical practice? <i>Circulation Cardiovascular Interventions 2010;3:216-223</i>	77
Chapter 6	Survival of patients after ST-elevation myocardial infarction: external validation of a predictive biomarker model <i>Clinical Chemistry 2012;58:1063-1064 Letter to the editor</i>	97
Chapter 7	Multiple biomarkers for the prediction of short and long-term mortality after ST-elevation myocardial infarction: the Amsterdam Groningen collaboration <i>Journal of Thrombosis and Thrombolysis 2013;36:42-46</i>	103
Chapter 8	Value of repeated measurements of NT-proBNP after acute myocardial infarction: data from the GIPS-III trial <i>Submitted</i>	113
Chapter 9	Summary	133
Appendices	Summary in Dutch Nederlandse samenvatting	145
	Acknowledgements Dankwoord	153
	Bibliography	159
	Curriculum Vitae	163
