Acknowledgement

Many people have helped and supported me in the completion of this PhD thesis. Some of them deserve a special gratitude.

First, my thanks go to Prof. Dr. J. van Dijk for promoting me as a PhD candidate in Groningen University. I am most grateful to Prof. Dr. H. Folmer who has guided me in each step of the completion of this thesis. His visits to Bandung for direct supervisions and his timely comments on many draft versions of the chapters of this thesis deserve the highest appreciations. It is always an enjoyment to have a serious discussion with him. I learned how to be a good researcher from him.

My sincere gratitude goes to Dr. J.H.L. Oud. He is the one, who initiated my PhD program and introduced me to Prof. Folmer. His first visit to Bandung had brought a new horizon for me by introducing Structural Equation Modeling. He also involved in the completion of the three papers in this thesis. He visited me in Bandung for working on the paper as well as hosted me in his house during my stays in the Netherlands. My expertise in Structural Equation Modeling is originated from him.

This program would have been impossible without the support from the Deans of Mathematics and Natural Sciences (Prof. Dr. W. Hemawan and Prof. Dr. B.N. Ruhjana) and the Heads of Statistics Department (Dr. S. Padmadisastra, Drs. G. R. Setyanto, Dra. A. Chadidjah, Dr. J. Suprijadi and Dr. T. Toharudin) of Universitas Padjadjaran. The faculty and the department have allowed me to use their facilities for conducting the researches. In addition they provided financial support for supervision process and presenting my papers in international conferences.

I thank A. Merburg for helping in administrative matters during the period of the program.

Special thanks to my external PhD fellows, Efi, Toni and Mindra for their togetherness and encouragement. I also thank to Karin Folmer and Maria Oud, who always well came me with warmth in their houses and encourage me to finish the program. My friends in Nijmegen who always gave me comfort during my stays in the Netherlands, Katja and Kai, Mascha and Clemens, and Pak Gus.

Finally, I thank my wife, Meli Fardillah, my son Di'Arthanian Sidik and my daughter Di'Arquetta Utami. Thank you for your patience, understandings, and encouragements. You are the flames keeping my spirit high. All heavy things are light with you all around.
