The research presented in this thesis was performed in the Materials Science group of the Zernike Institute for Advanced Materials at the University of Groningen, the Netherlands.

This work was funded by Foundation of Fundamental Research on Matter (FOM, Utrecht, The Netherlands), which is part of the Netherlands Organization for Scientific Research (NWO) in the framework of the Industrial Partnership Program on Size Dependent Material Properties of the Materials innovation institute (M2i , Delft, The Netherlands), project M62.7.08SDMP013.
