Modelling household energy consumption to understand sustainable energy behaviour

An integrated approach

PhD thesis

to obtain the degree of PhD at the
 University of Groningen
 on the authority of the
 Rector Magnificus Prof. C. Wijmenga
 and in accordance with
 the decision by the College of Deans.

This thesis will be defended in public on
 Thursday 22 September 2022 at 16.15 hours

by

Maliheh Namazkhan

born on 18 September 1986
 in Aliabad, Iran

Supervisors

Prof. C.J. Albers

Prof. E.M. Steg

Assessment Committee

Prof. R.R. Meijer

Prof. W. Poortinga

Prof. B. Gatersleben

Table of Contents

1. Introduction	9
1.1 Explaining actual gas consumption in residential buildings	11
1.2 Investigating the relationships between building characteristics, socio-demographic variables, psychological factors, and room temperature settings	14
1.3 Relationship between socio-demographics and psychological factors and intention to install PV	16
1.4 Relationships between socio-demographics and psychological factors and sustainable PV use	18
1.5 Overarching discussion of the results from the previous chapters	21

2. A decision tree method for explaining household gas consumption: The role of building characteristics, socio-demographic variables, psychological factors, and household behaviour	23
2.1 Impact of building characteristics on household gas consumption	24
2.2 Impact of socio-demographic variables on household gas consumption	25
2.3 Impact of gas use behaviour on household gas consumption	26
2.4 Impact of psychological factors on household gas consumption	26
2.5 Current study	27
2.6 Method	28
2.7 Results	37
2.8 Discussion	42
2.9 Conclusions	48
Appendix A	49

3. The role of environmental values, socio-demographics and building characteristics in setting room temperatures in winter 51

3.1 Impact of building characteristics on room temperature settings. 52
3.2 Impact of socio-demographic variables on room temperature settings 53
3.3 Impact of psychological variables on room temperature settings 54
3.4 Aim of this study. 54
3.5 Materials and methods. 55
3.6 Results 60
3.7 Discussion 68
3.8 Conclusion 71
Appendix A 73

4. Relationships between socio-demographic variables, psychological factors and the likelihood of installing PV. 75

4.1 Method 77
4.2 Results and Discussion. 81
4.3 Conclusion 86

5. Do socio-demographic variables and psychological factors explain sustainable photovoltaics use? 89

5.1 Socio-demographic variables that may affect sustainable PV use. 90
5.2 Psychological factors that may affect sustainable PV use 92
5.3 Understanding dynamics in actual net electricity use 94
5.4 Method 95
5.5 Results 100
5.6 Discussion 103
5.7 Conclusion 108
Appendix A 109

6. Discussion	111
6.1 Investigating the relationships between building characteristics, socio-demographic variables, psychological factors, and actual gas consumption in residential buildings	112
6.2 Investigating the relationships between building characteristics, socio-demographic variables, psychological factors, and room temperature settings	116
6.3 Relationship between socio-demographics and psychological factors and intention to install PV	118
6.4 Relationships between socio-demographics and psychological factors and sustainable PV use	120
6.5 Limitations of the studies and suggestions for future research	123
6.6 Concluding remarks	124

Summary	127
Samenvatting	133
References	138
Curriculum Vitae	152
Acknowledgements	154
