Electron transport across complex oxide heterointerfaces

Kumari Gaurav Rana

University of Groningen
**Zernike Institute
for Advanced Materials**

RuG Institute PhD thesis series 2013-21

ISSN: 1570-1530

ISBN: 978-90-367-6449-0 (printed version)

ISBN: 978-90-367-6403-2 (electronic version)

The work described in this thesis was performed in the research group Physics of Nanodevices of the Zernike Institute for Advanced Materials at the University of Groningen, the Netherlands. Part of the Work is also done in collaboration with University of Tokyo, Stanford University and University of Twente. This work is part of the Vidi grant from the Netherlands Organization for Scientific Research (NWO) and the national NanoNed and NanoLab NL initiatives.

Contents

1	Introduction and motivation	1
1.1	Strongly correlated metal-semiconductor (M-S) interface	1
1.2	Why are manganites interesting ?	2
1.3	Hot electron devices with $\text{La}_{0.67}\text{Sr}_{0.33}\text{MnO}_3$	4
1.4	Scope of the thesis	6
1.5	Outline of this thesis	7
	Bibliography	9
2	Experimental details	13
2.1	Substrate surface preparation	13
2.2	Thin film growth	15
2.2.1	Pulsed laser deposition and RHEED	15
2.2.2	Electron beam evaporator	17
2.3	Film characterization techniques	18
2.3.1	Atomic Force Microscopy	19
2.3.2	X-ray diffraction	19
2.3.3	Transmission electron microscopy	20
2.3.4	DC magnetization measurements	21
2.4	Device fabrication	21
2.4.1	Wet etching using UV and deep UV lithography	22
2.4.2	Argon ion etching	22
2.4.3	Fabrication of Hall bars	23
2.4.4	BEEM device fabrication steps	24
2.4.5	Magnetic tunnel junctions	25
2.5	Physical property measuring system	27

2.6	Ballistic electron emission microscopy (BEEM): Set up	27
2.7	Magnetic tunnel junction measurement set up	31
2.8	Conclusions	32
	Bibliography	32
3	Metal-semiconductor interfaces and ballistic electron emission microscopy	33
3.1	Transport at metal-semiconductor interfaces	33
3.1.1	Schottky barrier formation	33
3.1.2	Depletion layer	35
3.1.3	Schottky barrier height	36
3.2	Electronic transport across a Schottky barrier	41
3.2.1	Thermionic emission	42
3.2.2	Electron transport by tunneling	42
3.3	Ballistic electron emission microscopy (BEEM)	43
3.4	BEEM Theory	46
3.4.1	Tunnel injection of non-equilibrium charge carriers	46
3.4.2	Transport across the metal base	46
3.4.3	Scattering mechanisms	47
3.4.4	Transmission across the M-S interface	49
3.4.5	BEEM transport models	50
3.4.6	BEEM spectroscopy	51
3.4.7	Hot electron attenuation length	53
3.4.8	BEEM sample requirements	53
3.5	Conclusions	55
	Bibliography	55
4	Fabrication, characterization and electronic properties of LSMO thin films	57
4.1	Introduction	57
4.2	Growth of LSMO thin films using PLD and RHEED	60
4.3	Structural characterization	61
4.3.1	Atomic Force Microscopy	61
4.3.2	X-ray diffraction	62
4.3.3	Transmission electron microscopy	64
4.4	Magnetic properties of thin films of LSMO	66
4.4.1	Role of heater to target distance	67
4.5	Electrical transport properties of LSMO films	70
4.6	Variable energy doppler broadened positron studies on LSMO films	76
4.7	Conclusions	81

Bibliography	81
5 Electronic transport in Nb doped SrTiO₃ single crystals and across Metal/Nb:STO	85
5.1 Introduction and Motivation	85
5.2 Electronic properties of Nb:SrTiO ₃ single crystals with different Nb doping	88
5.3 Doping dependent electrical characterization of Au/ Nb:SrTiO ₃ interfaces	93
5.4 Electronic transport across a LSMO/Nb:STO heterointerface at the nanoscale	95
5.4.1 Device fabrication and experimental technique	97
5.4.2 Results	98
5.4.3 Discussions	101
5.5 Electronic transport across Cu/Nb:STO interface	103
5.6 Electron transport across Au/Nb:STO interface	109
5.7 Conclusions	111
Bibliography	112
6 Hot electron transport in a strongly correlated transition metal oxide	117
6.1 Introduction and motivation	117
6.2 Hot electron transport across a LSMO/SMO/Nb:STO interface at RT	120
6.2.1 Fabrication and electrical characterization of devices	120
6.2.2 BEEM transmission studies in LSMO at room temperature . .	123
6.2.3 Hot electron attenuation length in LSMO at room temperature	124
6.2.4 Energy dependence of attenuation length in LSMO at room temperature	126
6.2.5 Discussion and analysis	127
6.3 BEEM imaging at the nanoscale	131
6.4 Hot electron transport across a LSMO/SMO/Nb:SrTiO ₃ interface at 120 K	131
6.5 Hot electron transport in LSMO using only the LSMO/Nb:SrTiO ₃ interface	135
6.6 Conclusions	137
Bibliography	137
7 Spin dependent transport across oxide multilayers	143
7.1 Magnetic tunnel junctions based on manganite	143
7.1.1 Basic thoery of tunnel junctions	144
7.2 Growth and fabrication of LSMO/STO/LSMO magnetic tunnel junction	145

7.3 Electrical characterization of magnetic tunnel junctions	147
7.4 Conclusion	151
Bibliography	152
Summary	154
Samenvatting	157
Acknowledgements	159
List of publications	165
Curriculum Vitae	167
