### Copyright

Other than for strictly personal use, it is not permitted to download or to forward/distribute the text or part of it without the consent of the author(s) and/or copyright holder(s), unless the work is under an open content license (like Creative Commons).

The publication may also be distributed here under the terms of Article 25fa of the Dutch Copyright Act, indicated by the "Taverne" license. More information can be found on the University of Groningen website: <https://www.rug.nl/library/open-access/self-archiving-pure/taverne-amendment>.

### Take-down policy

If you believe that this document breaches copyright please contact us providing details, and we will remove access to the work immediately and investigate your claim.

Downloaded from the University of Groningen/UMCG research database (Pure): <http://www.rug.nl/research/portal>. For technical reasons the number of authors shown on this cover page is limited to 10 maximum.

## Prepositions

1. MOAG-4/SERF is a modifier of protein aggregation and toxicity. (This thesis)
2. Aggregate promotion by MOAG-4/SERF is independent of known protein quality control systems. (This thesis)
3. MOAG-4/SERF1A acts early in the aggregation process and is not associated with inclusion bodies. (This thesis)
4. SERF1A selectively acts on amyloid-prone proteins indiscriminately of the primary sequence of the tested proteins. (This thesis)
5. Yeast Homologous Recombination is an efficient and versatile method for protein purification. (This thesis)
6. The greatest glory in living lies not in never falling, but in rising every time we fall.  
[Nelson Mandela]
7. Everything gets harder with distance unless you have a fulcrum and a lever.
8. *In vitro veritas.*
9. “It is good to have an end to journey toward; but it is the journey that matters, in the end.” — Ernest Hemingway
10. And who you meet on the way.
