Biomarkers and Prediction Models for Type 2 Diabetes and Diabetes Related Outcomes

Ali Abbasi

The research presented in this thesis was performed at the Department of Epidemiology in close collaboration with the Department of Internal Medicine/Nephrology, University of Groningen, University Medical Center Groningen (UMCG); and the Julius Center for Health Sciences and Primary Care, University of Utrecht, UMC Utrecht. This work was supported by the Netherlands Heart Foundation, Dutch Diabetes Research Foundation and Dutch Kidney Foundation. This research was performed within the framework of the Center for Translational Molecular Medicine; project PREDICt.

Publication of this thesis was financially supported by the University of Groningen (RuG), UMCG, Graduate School of Medical Sciences, Thermo Fisher Scientific/BRAHMS GmbH, the Netherlands Heart Foundation, Dutch Kidney Foundation, GlaxoSmithKline, Novo Nordisk, Roche and Boehringer Ingelheim.

“Biomarkers and Prediction Models for Type 2 Diabetes and Diabetes Related Outcomes” PhD thesis, University of Groningen, UMCG, the Netherlands.
