Four and half years ago, I contacted Prof.dr. Ronald Stolk, my first promoter, to inquire whether a PhD or research position would be available in his unit at the department of epidemiology. Ronald drew my attention to an exciting opportunity in his email when he returned from holidays. Dear Ronald, you offered me a collaborative position between the departments of epidemiology and internal medicine/nephrology. Within two weeks, I had a telephone discussion with Dr. Stephan Bakker, my first co-promoter, and we talked about the project in more details. My special gratitude goes to Ronald and Stephan, both of you trusted me. Ronald, you have ever supported and reminded me when I needed to act at pivotal points, to be on time and at a right place. I have been inspired by your conceptual thinking, lifetime perspectives and talent. Stephan, you always motivate me and are full of energy and enthusiasm to improve my scientific outputs. We reviewed and discussed every manuscript together. You gave me insightful and smart suggestions and ideas in each project. You played a major role in instructive collaborations with other national and international researchers.

I remember the first week of February 2009, when I came to University Medical Center Groningen; I first visited Dr.ir. Eva Corpeleijn, my second co-promoter, who introduced me to other staff members at the department and assisted me how to keep on with my project from the early beginning. I especially thank you, Eva, for organizing regular meetings, including teaching and support in communication skills. We had very nice discussions about research questions and clear solutions to the scientific problems. I learned a lot from your critical points. I really enjoyed working with you; you have been open-minded and listening carefully. It was my great pleasure to acknowledge Prof.dr. Gerjan Navis, my second promoter, a physician-scientist at the same time. You taught me how to think critically and innovatively, making advancements in science. In most meetings, we had stimulating talks and novel ideas together. Dear Gerjan, thank you a lot for your meaningful thoughts and supervision.

In the second year of my PhD, I visited the Julius Center, UMC Utrecht and worked with Dr.ir. Joline Beulens, my third co-promoter, Prof.dr. Yvonne van der Schouw, Dr. Linda Peelen and Prof.dr. Karel Moons for 2 years. Dear Joline, thank you very much! I enjoyed our fruitful collaboration which we celebrated at one of research meetings. You have always discussed smoothly and fast about challenges in our common projects and been welcome to talk about other upcoming issues. You

supported and encouraged me with valuable contributions in this manuscript that form the main part of my PhD thesis. I would like to thank Linda and Yvonne for their methodological instructions and helpful advice. You helped me how to improve structure and content of my papers. Dear Carl, I remember you teaching us at prognostic research course in 2009. Next, we started to work closely when you were invited as speaker at UMCG in 2010. I admire your different thinking and confidence about keep moving forward. I am keen to collaborate with you in near future. All my dear promoters and co-promoters, I appreciate your great scientific advices which taught me to be grown up as an independent researcher and epidemiologist in the future.

This was a 4-year PhD vacancy which was supported by the Center for Translational Molecular Medicine, a public-private partnership, with focus on biomarkers and prediction for type 2 diabetes. It was a very nice opportunity for me to be familiar with a large group of experts, scientists, project partners and decision makers in the Netherlands. In this large consortium, I worked and learned a lot with our research group meeting, work package 7, led by Yvonne, within the framework of Predict project “Biomarkers for the Prediction and Early Diagnosis of Diabetes and Diabetes-related Cardiovascular Complications” led by Prof.dr. Marten Hofker. Thank you, Yvonne and Marten, for your leadership and support. I would like to extend my thanks to Dorien, Susan, Ineke and Merel for nice chats and help in our research group.

I sincerely thank co-authors of my papers from UMCG, Prof.dr. Hans Hillege, Prof.dr. Rijk Gans, Prof.dr. Paul de Jong, Dr. Ron Gansevoort and Dr. Pim van der Harst for their ideas and significant contribution. I am grateful to other colleagues, Dr. Annemieke Spijkerman and Dr. Daphne van der A from the National Institute for Public Health and the Environment (RIVM) for precise reading and commenting on my papers and friendly conversations at the European Diabetes Epidemiology Group (EDEG) meeting. I would like to acknowledge other co-authors, Prof.dr. Wolfgang Rathmann and Dr. Bernd Kowall from German Diabetes Center the KORA study. I am grateful to Dr. Joachim Struck and Dr. Janin Schulte. Thank you, Joachim, for the collaboration between Thermo Fisher Scientific / BRAHMS and the PREVEND study and arranging a number assays for biomarkers in this cohort.

In 2010, we started collaborating with the department of Pharmacy, University of Utrecht to conduct genetic studies on course of diabetes. Dr. Olaf Klungel, Dr. Mark Groot and Dr. Patrick Souverein made remarkable efforts to arrange and extract data. This project has been led by Prof. Ronald Stolk and Dr. Behrooz Alizadeh. Dear Behrooz, many thanks to you for daily supervision and research nuances which you taught me in the genetic epidemiology unit, led by Prof.dr. Harold Snieder. A number of challenges we faced and then we resolved them appropriately. I hope we finish the manuscript in the very near future.

In this thesis, I used data from the PREVEND and the EPIC-NL cohorts. I express my thanks to all participants in both of studies, principal investigators,

steering committee and all the staff who were involved in gathering wonderful information.

In November 2008, I got first emails from Mr. Gert Dijkstra, the business manager of the department who arranged early documents and forms to start and continue my PhD fellowship here in Groningen. Thank you, Gert, for all organizational work and our conversations. I had received a number of emails from the institute of medical education and international service desk when we were moving to Groningen, thank you all for your help and early communications. I would express my thanks to Aukje, Petra, Marco, Hans, Han, Silvia, Mireille and other colleagues from the department for their assistance and friendly humor.

I am glad to know Dr. Douwe Postmus, my thoughtful office mate when I first started working at the department. Dear Douwe, thank you very much for being my paranymp and all your significant contributions on my papers such as statistical and critical points. I would like to thank other nice colleagues and friends who shared our office together, Gimon, Qi, Anees and his kind wife Barbara. I enjoyed my time with all you guys, our daily talks and events outside the office. I sincerely thank other colleagues of my wife, Dr. Johannes van der Want with his wife, Dr. Ben Giepmans with his wife, Henk, Ruby, Freark and Jeroen from the department of cell biology, UMCG for their hospitality. Dear Han, I remember you as an irreplaceable man when Shabnam came to your department. I appreciate your in-depth kindness and support for us like a father. I express my thanks to Dr. Marco Harmsen for his positive attitude and lessons in planning and time management during my PhD journey. I would like to thank Prof.dr. Peter Burbach, head of the Department of Neuroscience and Pharmacology, UMC Utrecht, for his warm and assurable words.

It is my sincere pleasure to thank Prof.dr. Nick Wareham, director of the MRC Epidemiology Unit, University of Cambridge, Prof.dr. Karel Moons and Prof.dr. Rijk Gans who agreed to be members of my reading committee. I have learned a lot from all of you from your publications, lectures and critical questions on my papers and thesis.

Since the first week of February 2009, when I came to the hospital, I met many friends, Reza (Goles), Azi, my classmates in the Tehran University of Medical Sciences (1997-2005), Sara, Leila, Niloofar, Vahid, Mehdi, Goli, Negin, Solmaz, Ghazaleh, Emad, Reza (Nejadnik), Samira, Anees, Barbara, Adriana, German, Nastaran, Sina, Rohi, Sima, Hamed, Pantea, Hadi, Soheila, Saleh, Nima, Mojtaba, Sanam, Mohammad, Mehrnoosh, Fahimeh, Mahdi, Pariya, Fariba, Ali and Atussa. We had lots of fun with you guys and enjoyed the coffee breaks, birthday parties, Persian New Year (Norooz), cycling, watching films and playing games. Thanks deeply for nice memories and moments with you. Dear Azi, one of my best friends, you ever talk frankly and special thanks to you for being my paranymp at the defense. I would like to thank many other friends who are now living in Iran, US or Europe, especially those who we had a very happy time together during recent years, Ali, Roodabeh, Mohammad, Hamideh, Amoo, Arash, Hadi, Davood, Rezvan, Arezoo, Saman and Mona.

I must say a very special thanks to our beloved Maman (Fakhri) who will be ever missed; she completely loved us and gave up her life for us, Baba (Kazem) and father-in-law (Davood) for their continuous encouragement and help, mother-in-law (Zahra) for her great support, true love and patience. My deep thanks to my sisters, Maryam, Fati, Mahdiyeh and my brother, Hossein, my sister-in-law, Fereshteh, and Shahrzad. Dear Shahrzad, thank you again for your honesty and unconditional help. I enjoyed visiting my relatives and family and many thanks to your warm hospitality, generous love and unforgettable memories, my grandma (Aji) you have loved and always supported us, grandpa (Agha), my aunts, Foroogh, Saydeh, Amme, my uncles, Daii Mahdi (the kindest man with Soheila), Amoo Reza, Amoo Mohammad and their nice sons and daughters; my wife's family who accepted me as their own son, Khaleh Maryam, Masoom and Azam and their spouses and wonderful children, Abbas, Samira, Akhkan and Mohammad Reza.

In January 2009, I started packing bags with my dearest Shabnam, my beautiful love and soul mate, who shared her life with me over a decade. I was always thinking how to say my deepest thanks and feelings to you. You save my life every day; I miss my life when I miss you. I would love you to accompany me in the future journey to UK and afterwards.

I wish you all the best in our New Year (Norooz 1392).

Ali
