## **Chapter**

# **9**

Finally, it is time to express my gratitude to the people who helped me during my life as a PhD student because their contribution has been invaluable to me.

First and foremost, I would like to extend my sincere appreciation to my supervisor, **Simone**, for believing in my ability and providing me with the opportunity to work on this project as well as for her professional and personal support throughout this PhD. None of this work would have been possible without her passion, insight, enthusiasm, commitment, effort and patience.

My special gratitude goes to my promotores, **Andre** and **Dick**, for their invaluable support, insightful guidance and encouragement throughout this PhD. Andre and Dick, thank you.

I am thankful to all the members of the reading committee of my thesis, **Prof. Lanius**, **Prof. Elzinga** and **Prof. Hulshoff Pol** for their willingness to review this thesis.

I wish to extend my appreciation to **Nel**, **Ellert**, **Gareth** and **Andy** for their significant contribution in this project and their valuable input that improved the quality of this work.

I would also like to thank **Eline**, **Mechteld** and **Hedwig**, who worked alongside me on this project. Their friendly personality made the long hours of work enjoyable, and their hard work made this project possible.

I am thankful for the people in the Institute of Psychiatry (IoP), **Paola**, **Carmine**, **Rowena**, **Heather**, **Grant**, **Zefiro**, **Tiago**, **James** and **Christine**, who helped me during the two years of my PhD life in London. I would especially like to thank **Paola** for accepting me in her lab and giving me the opportunity to work on the AESOP data.

It is an immense pleasure to thank all my friends for providing me a peaceful and friendly atmosphere to live and work in Groningen and London, at the time I was away from all my family and friends: in Groningen: **Shabnam**, **Ali**, **Sanam**, **Mojtaba**, **Mehnoush**, **Mohammad**, **Soheila**, **Hadi**, **Niloofer**, **Vahid**, **Mehdi**,

**Samira, Reza, Rohi, Sina, Fariba, Fareeba, Fahimeh, Mahdi, Saleh, Kashmiri, Maria, Hiwa, Reza, Azadeh, Nika, Anna, Abigail, Sarieh, Frank;** in London: **Borden, Frankie, Rivka, Jerry, Rita, Alexa, Soumitra, Grace, Husa, Maheeba, Neda, Laila** and **Nemat**.

I especially would like to thank my office-mates, **Eline, Esther, Marie-Jose** and **Shankar** for being always there for me and for being really wonderful and supportive towards me during the rough times by providing their emotional and scientific support.

I would like to extend my thanks to the colleagues and staff at NiC: **Hedwig, Gerry, Diana, Janine, Evelyn, Edith, Remco, Hildebrand, Lisette, Brani, Claire, hui, Jorien, Katharina, Leonie, Annerieke, Marieke, Marjolijn, Marte, Michelle, Ramona, Gemma, Jan-Bernard, Kris, Hanneke, Linda, Amy, Luca, Barbara, Doety, Funda, Leonardo, Richard, Dave, Marije, Mathijs, Johan, Nynke, Jojanneke, Manasa, Dianne, Betty, Aditya, Anita** and **Judith**. It has been a great pleasure to know you and work with you.

I would like to thank my **Mom** and **Dad**. Living far from you has been really difficult for all of us but your patience and constant love made it possible for me to get where I am today. No words can sufficiently express my appreciation to you. Deepest thanks to my sisters, **Soheila** and **Parisa**, my brother **Pezhman**, and my brother-in-laws **Saeed** and **Mohammad** for their kindness and emotional support. I would also like to thank my **family-in-law** for welcoming me into their family and for their love, support and prayers.

Last but not least, I would like to thank **Hamed**, my wonderful husband and soul mate, for standing by my side and always motivating me, and for being incredibly supportive of me throughout this period. Thanks for patiently waiting for me to finish my PhD and join you. I hope that I can, at least partly, repay you while you are busy writing your own thesis.

**Curriculum Vitae**

**Chapter**

**10**

### Education

2008 – 2013: PhD student, University Medical Center Groningen (UMCG), Groningen, The Netherlands

2009 – 2011: Honorary PhD student, Institute of Psychiatry (IoP), King's College London (KCL), London, United Kingdom

2003 – 2006: M.Sc, Biomedical Engineering (Bio-electrics), Amirkabir University of Technology, (Tehran Polytechnic University), Tehran, Iran.

1999-2003: B.Sc, Biomedical Engineering (Bio-electrics), Isfahan University, Isfahan, Iran

1995-1999: High School Diploma in “Mathematics and Physics” from NODET (National Organization for Development of Exceptional Talents) Bandarabbas, Iran

### Teaching and work experience

Fall 2010: Co-supervisor of an undergraduate thesis entitled: *The neuroanatomy of trauma - hippocampal and amygdala volume in dissociative identity disorder*. King's College University, London, United Kingdom

Summer 2010: Teaching Brain image segmentation techniques to PhD students, King's College University, London, United Kingdom

Summer 2007: Co-supervisor of an undergraduate thesis entitled: *ECG Arrhythmia Detection Using Neural Networks*. Amir Kabir university of Technology, Tehran, Iran

Spring and Summer 2007: Teaching MATLAB Programming to biomedical engineering master students, Amir Kabir university of Technology, Tehran, Iran

2006 – 2007: Head of the R&D section at a biomedical engineering company (CTM Co.), Tehran, Iran.

### Grants and awards

David Caul Award in 2010 from the International Society for the Study of Trauma and Dissociation (ISSTD). This Award is given for the best published or non-published paper, thesis, or conference abstract written by a resident or trainee in the field of dissociation and/or trauma.

Master project was supported by Iran Telecommunication Research Center (ITRC), Tehran, Iran

### List of Publications

Lappin J.M., Morgan C., **Chalavi S.**, Morgan K.D., Reinders A.A.T.S, Fearon P., Heslin M., Zanelli J., Jones P.B., Murray R.M., Dazzan P. (2013) Hippocampal increase following first episode psychosis is associated with good clinical, functional and cognitive outcomes: Hippocampal plasticity and recovery in psychosis. *Psychological Medicine*.

(2013) Dissociative part-dependent biopsychosocial reactions to backward masked angry and neutral faces: An fMRI study of dissociative identity disorder. *Neuroimage: Clinical* 3:54-64.

**Chalavi S.**, Simmons A., Dijkstra H., Barker G.J., Reinders A.A.T.S. (2012) Quantitative and Qualitative Assessment of Structural Magnetic Resonance Imaging Data in a Two-Center Study. *BMC Medical Imaging* 12:27.

Zivari adab H., Firoozabadi S.M.P., **Chalavi S.**, Maghooli K. (2008) Simulation and Analysis of Needle Electromyogram in Emery-Dreifuss Muscular Dystrophy by using line source model. *Conference Proceeding IEEE Engineering in Medicine & Biology Society*, 338-42.

### Oral Presentations

**S. Chalavi**, E.M. Vissia, M.E. Giesen, A.A.T.S Reinders (2012). Symposium: *Neuroimaging Dissociative Identity Disorder*. The 3<sup>rd</sup> European conference of European Society of Trauma and Dissociation (ESTD), Berlin, Germany.

**S. Chalavi**, G.J. Barker, A. Simmons, H. Dijkstra, A.A.T.S. Reinders (2010). *Optimizing MRI data acquisition for Freesurfer and VBM analyses in multi-centre studies*, British Chapter of ISMRM Postgraduate Magnetic Resonance Symposium, Institute of Psychiatry, King's College London.

H. Zivari adab, **S. Chalavi**, S.M.P. Firoozabadi, K. Maghooli (2008). *Simulation of needle Electromyogram in Poliomyelitis using line source model*. 14<sup>th</sup> Iranian conference on Biomedical Engineering (ICBME2008), Shahed University, Tehran, Iran.

**S. Chalavi**, M.H. Moradi, H. Zivari adab (2007). *Discrimination between CHF and Normal patients by using linear and nonlinear analyses of HRV*, 13th Iranian conference on Biomedical Engineering (ICBME2007), Sharif University of Technology, Tehran, Iran.

## Poster Presentations

**S. Chalavi**, B. B. Frederick, R. L. Savoy, P. C. Wolk, B. Forester, E. Vissia, A. A. T. S. Reinders (2011). *Cortical thickness and subcortical volumes in dissociative identity and mood disorders*. Human Brain Mapping, Quebec, Canada.

**S. Chalavi**, G.J. Barker, A.A.T.S. Reinders (2010). *Can a decrease in slice thickness increase the detection of subtle task effects? A pilot fMRI study*. Human Brain Mapping, Barcelona, Spain.

**S. Chalavi**, G.J. Barker, A. Simmons, H. Dijkstra, A.A.T.S. Reinders (2010). *Optimizing MRI data acquisition for Freesurfer and VBM analyses in multi-centre studies*. Human Brain Mapping, Barcelona, Spain.

**S. Chalavi**, M.H. Moradi (2008). *Detecting Nonlinearity and Chaos in Heart Rate Variability (HRV) Series of Healthy Persons and AF Patients*. 5<sup>th</sup> Conference of the European Study Group on Cardiovascular Oscillations, Parma, Italy.

M. Azarpour, **S. Chalavi**, S.A. Seyyedsalehi, (2008). *Using RBF neural network and Hermite functions in classification of QRS complexes in order to Arrhythmia detection*. Ehealth & medical ICT Application in IRAN (ehealth2008), Tehran, Iran.

H. Zivari adab, **S. Chalavi**, S.M.P. Firoozabadi, K. Maghooli (2007). *Statistical comparison between features extracted from simulated electromyogram in normal and EDMD situations*. 1<sup>st</sup> Iranian Data mining conference (IDMC2007), Amirkabir University of Technology, Tehran, Iran.

**S. Chalavi**, M.H. Moradi (2007). *Comparison Between Nonlinear Features of Heart Rate Variability in Normal and Cardiac Disease Patients*. Iranian conference on Electrical Engineering (ICEE2007), Amirkabir University of Technology, Tehran, Iran.

**S. Chalavi**, M.H. Moradi (2006). *Arrhythmia detection based on linear analysis of heart rate variability and classification of its episode rhythm*. 12<sup>th</sup> Iranian conference on Biomedical Engineering (ICBME2006), Sahand University, Tabriz, Iran.
