Acknowledgments

Alhamdulillah rabbil alamin ... Here we come, to the "first page" of every thesis. After spending almost 5 years of pleasant time in the Solid State Materials for Electronics group, I would like to thank everyone who contributed to this thesis.

Firstly, I would like to say many thanks to my promotor, Prof. Thom Palstra. Thom, we met for the first time at ITB in 2006, and then I came in the same year to your group for a 3 month research project. Thank you for accepting me as a PhD in your group. I am really fortunate to have you as my promotor. We had discussions not only about science and research-related work, but also regarding my future career.

Graeme, I was always afraid that I would disappoint you, which I think I did on many occasions. Thank you for offering the project and PhD position to me. This thesis would not have been finished without your patient guidance and help. Your excellent expertise in crystallography and Rietveld refinement amazed me and helped me a lot. Your corrections and input on scientific matters and on the English improved this thesis very much. Thank you for everything.

I am also grateful to have Prof. Robert de Groot as my second promotor. Thank you for the input and corrections. I would also like to thank the reading committee: Prof. Paul van Loosdrecht, Prof. Andrea Damascelli, and Prof. Claudia Felser. Thank you for your suggestions and corrections regarding my thesis.

Prof. Tjia May On (*Pak Tjia*) and Dr. A. Agung Nugroho (*Pak Agung*) are the two people who have contributed a lot to my scientific journey. From *Pak Tjia* I learned a lot about how to understand things better, and he makes me love science even more. *Pak Agung* opened my door to The Netherlands, opened the opportunity for me to obtain a PhD degree, and introduced me more deeply to condensed-matter physics. *Pak Tjia* dan *Pak Agung*, *terima kasih banyak*.

Jacob *en* Henk Bruinenberg, *bedankt voor alles*. You are my saviors. My experiments would not have worked without your help. Henriët, you listened to all my grumbles and took care of everything regarding administration. Thank you very much. Thanks to Gert Alberda van Ekenstein from the Polymer group for helping me in doing the TGA/DSC experiments. Toni (Antonio Caretta) and Puri helped me a lot with the Raman experiments. Thank you, guys. Mbak Puri, we discussed a lot because we worked on similar systems. I wish you success with

your position at ITT-Telkom Bandung. Toni, you are a very rare species, you need to be conserved. Your style of working is extraordinary, very straightforward and direct. Thank you for everything, especially the science regarding Raman and the football times.

Shiva, we shared an office for 4 years. Despite our differences in the way of working and analyzing things, we built a great team. I enjoyed your nice Indian percussion using the office desk, especially after 3 pm, almost everyday. Thanks a lot. I wish you good luck with your future career. Baomin, you are always energetic, even if you have to travel 3 hours early in the morning from Nijmegen all the way to Groningen. Thank you for the collaborations. To the current and former lab members, you have created a really conducive yet fun atmosphere in the lab. Anne, Johan, Ard, Gijsbert, Saeedeh, Christophe, Igor, Umut, Alex, Oleksiy, Mai, Mufti, Shiva, Jeroen, Aisha, Thomas, Arnoud, Sylvia, Guowei, Anil, and all the other lab visitors, thank you for everything.

Teh Nisa and Kang Nandang (Mufti), both of you are like my brother and sister. I am really lucky to know both of you. I found another family while staying in Groningen. Arramel, Insanu, Guntur, and Pak Ali, my partners in crime, I wish you success with your next steps. My best wishes also for your families, Puti and Meisya, Intan and the kids, Gemi, Amira, and Amira's future brother/sister. Arramel, I hope there will be another time when we sit together again, moving those joysticks, and scoring beautiful goals. *Mbak Tina*, thank you for trusting me and keeping me busy with the beautifying of your experimental data. :p *Bang Fanny Lintong*, *kita masih bisa terus badminton bareng ya. Masih lama aku di sini. Terima kasih untuk semuanya.* *Kadek Dian*, I always look forward to your jokes and positive discussions via the Yahoo! messenger. I would also like to send special thanks to *Mbak Lia* and *Mas Yayok*, *Tante Indah* and *Oom Yon*, *Kang Hendi*, *Nadya* and *Johan*, *Robby*, *Lia*, *Astri*, *Iqbal* and *Eryth*, *Rachma*, *Nizar*, *Teh Uyung*, *Pandji* and *Faizah*, *Izul* and *Alia*, *Muizz* and family, *Wahono* and family, the *Lewenborg* clan (*Mas Adhi*, *Mbak Mita*, *Mas Hengki*, and their families), *Uwak As Delfzijl*, and all the others that I cannot mention one by one. *DeGromiest*, *PPIG*, and *Amor Badminton Club*, thank you for keeping me busy with non-scientific activities, otherwise my life here would have been boring. *Daniel*, *Chetan*, and *Zetao*, we make a great badminton team! Thanks for the badminton times. It was nice playing with you.

To my families thank you for the support. My cousins in Bandung, Jakarta, and Melbourne, *Kak Fitri* and *Mas Hendrik*, *Kak Dini*, *Ria* and *Rangga*, "*Ende*" *Ryan*, *Okkie*, *Kak Opi* and *Bang Akbar* and their children, I wish you success in your life. My family in Kediri also contributed to what I have achieved so far. *Ayah Suko* and *Mama Binti*, thank you very much. My brothers and sisters, *Reddy*, *Kenny & Zul & baby Leyna*, *Phaskya*, and *Karen*, I wish you success with your next journey in life.

Mama dan Papa, thank you for supporting what I have chosen for my life. *Anakmu udah jadi doktor nih, doktor pertama di keluarga Yusuf ya.* Thank you for raising me up until I became like this. *Semoga apa yang sudah dan akan Iging*

raih bisa terus membahagiakan dan membanggakan Mama dan Papa. I will not forget how Mama and Papa worked hard for me during my childhood so that I can get a better education.

Wak Nila, Ujuk, Cik Wie, Tante Yayuk, Oom Sam, Tante Nelly, Wak Da, Wak Irham, thank you for accompanying Mama & Papa in Bandung. *Terima kasih sudah membantu merawat dan menyemangati Papa sewaktu Papa sakit. Nyai Nyimas Amnah (alm.),* my grandmother, you also played a big role in raising me during my childhood. It is also because of you I can achieve this. *Dina, ich hoffe, alles ist gut, jangan keluar dari Eropa ya, menetap di sini aja.* Kiki & Agung, thank you, we had many nice times visiting you in Gent and Louvain la Neuve. I wish you a successful journey. My brother, Anto, *sukses ya. Jangan pernah patah arang, semangat terus! Bikin bangga Mama dan Papa.* I'm convinced that you will be successful. My wife, Desti Alkano, you are always supportive and you want the best for me. Thank you for your support, being caring and patient all the time. I am very lucky to have you. I always pray that we will stay like this forever.

Groningen, April 2012

Syarif Riyadi
