The role of disease risk and  
life history in the immune function  
of larks in different environments

rijksuniversiteit  
 groningen

The research presented in this thesis was carried out at the Animal Ecology Group, Centre for Ecological and Evolutionary Studies (CEES) at the University of Groningen, The Netherlands. The research was financially supported by a VENI grant (863.04.023) from the Netherlands Organisation for Scientific Research (NWO) and a Rosalind Franklin Fellowship from the University of Groningen, both awarded to B.I. Tieleman.

The printing of this thesis was partly funded by the University of Groningen and the Faculty of Mathematics and Natural Sciences.

RIJKSUNIVERSITEIT GRONINGEN

The role of disease risk and  
life history in the immune function  
of larks in different environments

PROEFSCHRIFT

ter verkrijging van het doctoraat in de  
Wiskunde en Natuurwetenschappen  
aan de Rijksuniversiteit Groningen  
op gezag van de  
Rector Magnificus, dr. E. Sterken,  
in het openbaar te verdedigen op  
vrijdag 24 februari 2012  
om 16.15 uur

door

**Nicholas Piers Christopher Horrocks**

geboren op 21 januari 1979  
te Londen, Verenigd Koninkrijk

Promotor: Prof. dr. B.I. Tieleman

Copromotor: Dr. K.D. Matson

Beoordelingscommissie: Dr. A.L. Graham  
Prof. dr. H. Richner  
Prof. dr. J.D. van Elsas

# Contents

## **Part I Introduction**

- Chapter 1 Introduction and synthesis 9
- Chapter 2 Pathogen pressure puts immune defence into perspective 17

## **Part II Immune defence along a gradient of predicted disease risk**

- Chapter 3 Environmental disease risk proxies explain variation in immune investment better than pace-of-life indices 37
- Chapter 4 Antimicrobial proteins in avian eggs: ovotransferrin increases but lysozyme decreases with environmental correlates of trans-shell infection 53

## **Part III Environmental and seasonal variation in immune defence and disease risk**

- Chapter 5 Immune defences are associated with microbial pressure rather than life history in larks from contrasting environments 69
- Chapter 6 Seasonal patterns in immune indices reflect microbial loads on birds but not microbes in the wider environment 89

## **Part IV A contribution to the ecologists' immunological toolbox**

- Chapter 7 A simple assay for measurement of ovotransferrin – a marker of inflammation and infection in birds 109
