Acknowledgements

First and foremost I would like to thank my supervisors, Rudi, Philip and Ben. Rudi, thank you for your suggestions over the years. Philip thank you for your ideas and patience as well as your sense of humor. Ben thank you for everything you have done for me over the years. You are always enthusiastic, and kind (especially every time I got scooped) and I could not have asked for a better daily supervisor. Thank you so much for facilitating my last 6 months in Groningen and for being so supportive of my decision to go to law school.

I would like to thank the reading committee, Prof. Hiemstra, Prof. Mindt and Prof. Minnaard for taking the time to read my manuscript and for your helpful suggestions.

Wesley, thank you for answering many questions over the years, for reading my chapters and for trying to correct my English. Gerard, thank you for having an open door for my bio-related questions. Adri, thank you for your chemical suggestions and for coming up with the synthetic route in Chapter 6.

Thank you to Prof. Dick Janssen, Christiaan Postema and Wiktor Szymanski for our fruitful collaboration on the work from Chapter 4.

Anne, thank you for all of your hard work on Chapter 6, I know that the going was tough at times, but you persevered!

Leila, you have been my partner on this project and my friend for the last four years. No one better understands how frustrating it can be to work in such a rapidly developing field, and I thank you for all of your help over the years and for being a “big sister” to me.

On that note, thank you to the UMCG PhD students and staff for their help throughout this collaboration, Giuseppe Carlucci for your help with the HPLC and Erik de Vries for your chemistry suggestions.

I would also like to thank Theodora for her patience with all my HPLC problems, Ebe for being nice even though we had the “messiest” lab, and Monique for her help with GC. Thank you Hilda and Alphons, especially for helping with the paperwork of my promotion.

I had the fortune of working in a wonderful lab. Thank you to all my labmates over the years who made it fun to come to work every day: Tati, Bea, Toon, Tim, Artem, Jack, Petra, Wim, Massimo, Manolo and all the students Anne, Anne, Ken and Barbie. Try to keep the Rondje lab trophy. To all the members of Adri, Anna, Ben, Syuzi, Sijbren, Wesley and Gerard's groups, thank you for the wonderful work environment. It has been a pleasure.

Mathieu, thank you for helping me every time with SPPS! Jeffrey Bos, thank you for your help with everything peptide-related. Martín, Jeffrey Bos and Wiktor, I am grateful for your corrections on several versions of my thesis.

Wiktor, I am especially grateful for your help over the years with everything from Dutch class to enzyme preparation; you are an excellent scientist and friend.

Eloy, Maggie and Frank- thank you for sharing all the good times (breakfasts) in Van Starckenborghstraat and beyond.

Thank you Rika, Jan, Evert, Oma Bos and Oma Wit for welcoming me into your home and for forgiving me for my lack of Dutch or Gronings.

To Conny, Lorette, Jolien, and Bonnie-thank you for being my family away from home, and for all the wonderful weekends in Stad.

I had the fortune of living with some wonderful roommates: Nop, Tony and Andrea. Tony thanks for all the chats over tea and Nop thank you for being such an excellent friend (and for not letting me eat only salad...).

Thank you to Jack and Megan for listening to and advising on all things law school! Jack, thanks for all your help at work, it was a pleasure to work literally beside you.

Johannes and Pieter, we will go down in history as being the ONLY work week to ever stay in the Netherlands, but it was worth it for the work week meetings (“one for the road”).

Adi and Ashoka, thank you for being great friends, and for organizing the trip of a lifetime. See you in Boston!

I’ve had the fortune of making some truly wonderful friends over the years, so to all of those mentioned above, as well as Alena, Fiora, Erik, Bjorn and Suzanne, Judit, Nataša, Bas and Suzanne, Jos, Jort, Pat, Celine, Miriam, Nikki, Emi and Erka, thank you.

I am thankful to have Jochem and Lorina as my paranimfs today. Jochem, I value our friendship (and your argumentative nature). Lorina, thank you for being my best friend and partner in crime in all things (from Coffee Company to the Rumba). Gjeja me e mire qe akullorja pati bere ndonjehere ishte te na lidhte ne bashke.

I would like to thank Pieter for being supportive literally every step of the way during this PhD. I could not have chosen to start my PhD on a better day!

Finally I would like to extend my gratitude to my family: Frank, Colin and Malcolm for putting up with my lack of communication and to my parents for their unparalleled love support.

Lachlan
