## Content

<b>Chapter 1:</b> General Introduction	9
<b><u>PART 1: Personality and Metabolism</u></b>	17
<b>Chapter 2:</b> Individual variation in the (patho)physiology of energy balance.	19
<b>Chapter 3:</b> The passive coping Roman Low Avoidance rat, a non-obese rat model for insulin resistance.	47
<b>Chapter 4:</b> Coping style predicts the (in)sensitivity for developing hyperinsulinemia on a high fat diet in rats.	67
<b><u>PART 2: Treatment and Personality</u></b>	85
<b>Chapter 5:</b> Pharmacological treatment of insulin resistance in rats depends on coping style.	87
<b>Chapter 6:</b> Exercise-based control of hyperinsulinemia in rats: role of coping style and compliance.	105
<b>Chapter 7:</b> Passive personalities adapt physical activity levels to dietary conditions.	121
<b>Chapter 8:</b> Personality types and the success of life style intervention; a study in humans.	147
<b><u>PART 3: Anorexia Nervosa and Personality</u></b>	165
<b>Chapter 9:</b> Neurobiology of Hyperactivity and Reward in Anorexia Nervosa: agreeable restlessness in Anorexia Nervosa.	167
<b>Chapter 10:</b> Dopamine 1 receptor antagonism prevents hyperactivity in rats hypersensitive for Activity Based Anorexia	187
<b>Chapter 11:</b> Discussion	211
