Acknowledgements

After all great and dark times through this long journey, this is the best time to show my gratitude to the people who surrounded me with their love and support in these accomplishments.

First and foremost, my sincerest and deepest appreciation goes to my first supervisor **Prof. Romana Schirhagl**. Dear **Romana**, thank you very much for giving me the opportunity to become a member of the Bioimaging and Bioanalysis (Diamond) group. And thank you so much for the trust, support, and friendship that you gave to me during my research. You were always patient and gave me positive feedback on my work. Thank you for always being available to answer questions and discuss problems. I am very grateful for the freedom you gave me in embracing my way of research, choosing the subject of focus, and even selecting the conference to participate in. You inspired me to become an independent researcher and helped me realize the power of critical reasoning. The way you expanded the lab, grew your own success, and your students' successes over the years were contagious and motivational for me. I also greatly appreciate your "open-doorpolicy", which makes it possible to discuss with you when any problem arises. I thank you wholeheartedly, not only for your tremendous academic support but also for helping me out with non-academic problems. Thank you for your great leadership, having you as my boss and mentor is a great treasure.

Next, I thank my second supervisor **Prof. M. Bagher Habibi Najafi**. I appreciate all your contribution of time, effort and also your support. I am very grateful for the freedom you gave me in embracing my research and choosing the subject of focus. I am always thankful for your friendship, empathy, and dedicated support for my PhD project.

I would like to thank the assessment committee, **Prof. Jan Berend Meijer**, **Prof. C.H. Casper van der Wal** and **Prof. Peter Olinga** for proofreading the thesis and for valuable comments.
