**HEMOSTATIC CHANGES AND
ANTITHROMBOTIC MANAGEMENT
IN KIDNEY TRANSPLANTATION**

Tamar A. J. van den Berg

COLOPHON

The work described within this thesis was financially supported by:
The University of Groningen Junior Scientific Masterclass (MD/PhD JSM grant)
The Tekke Huizinga Foundation (Groningen, the Netherlands)

Financial support for the printing of this thesis was gratefully received from:
University of Groningen
Graduate School of Medical Sciences (GSMS)
Nederlandse Transplantatie Vereniging (NTV)
LEO Pharma BV
Veldkamp Consulting BV, and
Verbruggen Palletizing Solutions

Hemostatic changes and antithrombotic management in kidney transplantation

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. C. Wijmenga
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

woensdag 7 december 2022 om 16.15 uur

door

Tamar A.J. van den Berg

geboren op 17 maart 1995
te Oldebroek

Promotores

Prof. dr. R.A. Pol

Prof. dr. J.A. Lisman

Prof. dr. S.J.L. Bakker

Beoordelingscommissie

Prof. dr. B.L. van Leeuwen

Prof. dr. I.P.J. Alwayn

Prof. dr. S. Middeldorp

Dr. Melanie Reijrink

Drs. Deby Verweij

TABLE OF CONTENTS

Chapter 1	General introduction <i>Adapted from: Pathophysiological changes in the hemostatic system and antithrombotic management in kidney transplant recipients. Revision submitted to Transplantation</i>	11
Part I	Renal graft thrombosis and antithrombotic management in kidney transplant recipients	
Chapter 2	Perioperative antithrombotic therapy does not increase the incidence of early postoperative thromboembolic complications and bleeding in kidney transplantation - a retrospective study. <i>Transplant International</i>	29
Chapter 3	Antithrombotic Management in Adult Kidney Transplantation - A European survey study. <i>European Surgical Research</i>	49
Part II	Hemostatic changes in the perioperative period of kidney transplantation	
Chapter 4	Preemptively and non-preemptively transplanted patients show a comparable hypercoagulable state prior to kidney transplantation compared to living kidney donors. <i>PLoS One</i>	63
Chapter 5	Aggravation of fibrin deposition and microthrombus formation within the graft during kidney transplantation. <i>Scientific Reports</i>	87
Chapter 6	Hypothermic machine perfusion ameliorates fibrinolysis and microthrombi clearance after DCD kidney donation in a porcine model. <i>Revision submitted to Transplantation Direct</i>	103
Part III	Recent international academic developments affecting transplantation research	
Chapter 7	Brexit and Transplantation Research: EU Funding and Scientific Collaborations. <i>Transplantation</i>	117

Chapter 8	Pairing of traditional journals with open access sibling journals – a bibliometric analysis. <i>Transplantation (adapted format)</i>	129
Chapter 9	Summary, General discussion and Future perspectives	139
Appendix I	Letter to the editor	158
	C4: The future of solid organ transplantation from the perspective of young transplant professionals. <i>American Journal of Transplantation</i>	
Appendix II	Summary in Dutch / Nederlandse samenvatting in gewone taal	162
	List of publications	166
	List of contributing authors	167
	Acknowledgements / Dankwoord	168
	Curriculum vitae	174

Between Scylla and Charybdis

*“Once you leave the sirens’ island” Circe had warned,
“you will have two sea-routes open to you. Both are highly dangerous –
and it is you who must decide which one is safer for your ship and crew.”*

Homer’s Odyssey

Translation by Menealos Stephanides
