The Origin of Stars Tales of the Unexpected in Extreme Environments

Proefschrift

ter verkrijging van het doctoraat in de
 Wiskunde en Natuurwetenschappen
 aan de Rijksuniversiteit Groningen
 op gezag van de
 Rector Magnificus, dr. E. Sterken,
 in het openbaar te verdedigen op
 maandag 21 november 2011
 om 16.15 uur

door

Sayit Höçük

geboren op 10 november 1979
 te Delfzijl

Promotor : Prof. dr. M. Spaans

Beoordelingscommissie : Prof. dr. R. S. Klessen
Prof. dr. P. D. Barthel
Prof. dr. D. R. G. Schleicher

ISBN 978-90-367-5054-7 (printed version)
ISBN 978-90-367-5053-0 (electronic version)

One dot, matters a lot.

M. A. Latif

Cover – Grand Universe by Gary Tonge / Urantia Foundation.

Contents

1	Introduction	7
1.1	The theory of star formation	8
1.2	The interstellar medium	11
1.2.1	Fragmentation	13
1.2.2	Turbulence	13
1.2.3	Metallicity and Dust	15
1.3	Equation of state	17
1.4	The initial mass function	19
1.5	Extreme environments	23
1.5.1	Active galactic nuclei	23
1.5.2	Starbursts	24
1.5.3	Feedback: radiative and mechanical	25
1.6	Numerical simulations	26
1.6.1	Grid codes	26
1.7	Thesis outline	27
2	Thermodynamics of molecular cloud fragmentation	29
2.1	Introduction	30
2.2	Simulations	31
2.2.1	Numerical model and simulation setup	31
2.2.2	Initial conditions	32
2.2.3	The simulations	33
2.2.4	Chemistry, cooling and heating	33
2.3	Results	35
2.3.1	Metallicity and multi-phase structure	36
2.3.2	The effect of metallicity, turbulence, and rotation on fragmentation	41
2.3.3	The effect of the environment on fragmentation	44
2.4	Conclusions and discussion	47

3	The impact of X-rays on the IMF	51
3.1	Introduction	52
3.2	Numerical model	52
3.2.1	The FLASH code	52
3.2.2	Sink particles	53
3.2.3	Radiative transfer	53
3.2.4	Initial conditions	53
3.3	Results	55
3.3.1	X-rays versus no X-rays: IMF and Jeans mass	55
3.3.2	Sink particle behavior	59
3.4	Conclusions and Discussion	59
4	Star formation near an obscured AGN	63
4.1	Introduction	65
4.2	Computational method	67
4.2.1	The numerical code	67
4.2.2	Refinement criteria	67
4.2.3	Multi-scale turbulence	68
4.2.4	The radiative transfer method	69
4.2.5	Sink particles	70
4.3	Models and initial conditions	72
4.3.1	A grid of models	72
4.3.2	The initial conditions	74
4.4	Results	75
4.4.1	Effects of X-rays	75
4.4.2	Effects of cosmic rays	78
4.4.3	Effects of UV	80
4.4.4	Effects of shear	82
4.4.5	Accretion onto sink particles	83
4.5	Conclusions and discussion	84
5	Summary and Outlook	101
5.1	Summary & conclusions	101
5.1.1	Molecular cloud fragmentation (chapter 2)	101
5.1.2	The IMF in active galaxies (chapters 3 & 4)	102
5.1.3	Conclusions	104
5.2	Outlook	104
5.2.1	Future work	104
5.2.2	Magnetic fields	106
	Bibliography	109
	Nederlandse Samenvatting	115
	Türkçe Özet	125
	Epilogue	135
