Eco-evolutionary feedbacks in self-organized ecosystems

**rijksuniversiteit
groningen**

The research presented in this thesis was carried out at the Spatial Ecology Department of the Royal Netherlands Institute for Sea Research (NIOZ-Yerseke), and the Theoretical Biology Group, part of the Centre for Ecological and Evolutionary Studies (CEES), of the University of Groningen (The Netherlands). This research was supported by the Dutch Science Foundation (NWO).

Eco-evolutionary feedbacks in self-organized ecosystems

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. E. Sterken
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

vrijdag 13 november 2015 om 12.45 uur

door

Monique de Jager

geboren op 25 februari 1984
te Spijkenisse

Promotores

Prof. dr. J. van de Koppel

Prof. dr. F. J. Weissing

Prof. dr. P. M. J. Herman

Beoordelingscommissie

Prof. dr. E. T. Kiers

Prof. dr. D. W. Sims

Prof. dr. W. M. Mooij

Contents

CHAPTER 1	General introduction	7
CHAPTER 2	Lévy walks evolve through interaction between movement and environmental complexity	23
Comment & Reply I	Emergent properties of the Lévy walk are not adaptive strategies	43
Comment & Reply II	Comment on 'Lévy walks evolve through interaction between movement and environmental complexity'	49
CHAPTER 3	How superdiffusion gets arrested: Ecological encounters explain shift from Lévy to Brownian movement	59
CHAPTER 4	Experimental evidence for inherent Lévy search behaviour in foraging animals	77
CHAPTER 5	Why mussels stick together: self-organization affects the evolution of cooperation	109
CHAPTER 6	Patterning in mussel beds explained by the interplay of multilevel selection and spatial self-organization	127
CHAPTER 7	General Discussion	153
	References	165
	Summary / Samenvatting	183
	Acknowledgements	195
	About the author	198
