PARANYMPHS

Fransien van Dijk

Luke van der Koog

The research described in this thesis was carried out within Groningen Research Institute of Pharmacy and University Medical Centre Groningen, University of Groningen, The Netherlands. Printing of this thesis was financially supported by the University Library and the Graduate School of Science, Faculty of Science and Engineering, University of Groningen, The Netherlands.

Habibie received a PhD scholarship from Indonesia Endowment Fund for Education (IEFE), Ministry of Finance of Republic of Indonesia.

Osteoprotegerin, RANKL and extra cellular matrix intersection in fibrosis

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Tuesday 20 December 2022 at 14.30 hours

by

Habibie

born on 20 September 1983
in Kendari, Indonesia

Supervisors

Prof. B.N. Melgert
Prof. J.K. Burgess

Assessment Committee

Prof. A.J. Moshage
Prof. A. Tatler
Prof. C. Mueller

Bismillahirrahmanirrahim
In the name of Allah, the Most Gracious and the Most Merciful

to my beloved family, teachers, friends, and colleagues

TABLE OF CONTENTS

Chapter 1	General Introduction	9
Chapter 2	The role of osteoprotegerin (OPG) in fibrosis: its potential as a biomarker and/or biological target for the treatment of fibrotic diseases	17
Chapter 3	Osteoprotegerin is more than a Possible Serum Marker in Liver Fibrosis: A Study into its Function in Human and Murine	49
Chapter 4	Osteoprotegerin is elevated in pulmonary fibrosis and associates with IPF progression	75
Chapter 5	RANKL contributes to lung tissue repair via promoting epithelial alveolar type II cells proliferation	101
Chapter 6	Interactions of osteoprotegerin with other extracellular matrix-related proteins in pulmonary fibrosis	121
Chapter 7	Stiff matrices do not induce cellular senescence in primary lung fibroblasts	139
Chapter 8	Regulation of Cellular Senescence Is Independent from Profibrotic Fibroblast-Deposited ECM	165
Chapter 9	General Discussion	197
Appendices	English summary	211
	Nederlandse samenvatting	216
	Acknowledgement	219
	About the author	224
	List of publications during PhD study	225
