STRUGGLE FOR SAFETY

Adaptive responses of wintering waders
to their avian predators

The work presented in this thesis was conducted at the Department of Marine Ecology (MEE), Royal Netherlands Institute for Sea Research (NIOZ).

The research was principally financed by the Royal Netherlands Institute for Sea Research. The Nature Conservation Prize of the Prins Bernhard Cultuur Fonds, Amsterdam, to Theunis Piersma covered three seasons of expeditionary funding. The Huib Kluijver Fonds contributed to costs for radiotransmitters, while the British Ornithologists' Union covered travel expenses for a special expedition to Banc d'Arguin.

The printing of this thesis was partly funded by the University of Groningen and the Faculty of Mathematics and Natural Sciences.

This thesis should be cited as:

van den Hout, P.J. (2010), *Struggle for Safety: Adaptive responses of wintering waders to their avian predators*. PhD Thesis, University of Groningen, Groningen, The Netherlands.

Cover design: Michael de Kok and Piet van den Hout

STRUGGLE FOR SAFETY

Adaptive responses of wintering waders
to their avian predators

Proefschrift

ter verkrijging van het doctoraat in de
Wiskunde en Natuurwetenschappen
aan de Rijksuniversiteit Groningen
op gezag van de
Rector Magnificus, dr. F. Zwarts,
in het openbaar te verdedigen op
vrijdag 17 december 2010
om 13:15 uur

door

Pieter Johannes van den Hout

geboren op 1 juni 1961
te Zwijndrecht

Promotor: Prof. dr. T. Piersma

Beoordelingscommissie: Prof. dr. J.S. Brown
Prof. dr. W. Cresswell
Prof. dr. A.M. de Roos

Contents

PART I: PREAMBLE

CHAPTER 1	General introduction	9
BOX I	Trial and Error	16
CHAPTER 2	Dense foraging flotillas of Eurasian Coots <i>Fulica atra</i> explained by predation by Ganges Soft-shell Turtle <i>Aspideretus gangeticus</i> ?	23
CHAPTER 3	Extreme head posture of birds: predation detection or sun avoidance?	29
BOX II	Mortality-driven versus fear-driven predator-prey interactions	37

PART II: LETHAL AND NON-LETHAL EFFECTS OF PREDATION AND PREDATORS ON SHOREBIRDS

CHAPTER 4	Differential mortality of wintering shorebirds on the Banc d'Arguin, Mauritania, due to predation by large falcons	43
BOX III	When shorebirds meet raptors	58
CHAPTER 5	Why young birds forage at nutritionally poor and dangerous places: classical food-safety trade-offs mediated by variation in foraging ability	63
BOX IV	Brown's patch use model extended by interference competition	79
CHAPTER 6	Cryptic intraspecific competition rather than juvenile mortality explains the safety careers in a group-living shorebird.	83

PART III: ADAPTIVE FLEXIBLE PHENOTYPIC RESPONSES TO PREDATION DANGER

CHAPTER 7	Ruddy Turnstones <i>Arenaria interpres</i> rapidly build pectoral muscle after raptor scares	97
CHAPTER 8	Differential responses of Red Knots, <i>Calidris canutus</i> , to perching and flying Sparrowhawk, <i>Accipiter nisus</i> , models	107
BOX V	Escape decisions: trade-offs between energy and safety prospects	120
CHAPTER 9	Predator escape tactics in birds: linking ecology and aerodynamics	125

PART IV: GENERAL DISCUSSION

CHAPTER 10	Discussion: Adaptive responses of wintering waders to their avian predators	147
	References	163
	Summary	184
	Samenvatting	187
	Acknowledgements	191
	Addresses of co-authors	198
