## Acknowledgments

The journey of PhD has come to an end, I would like to take this opportunity to express my acknowledgment to the people I have met during this journey. Without any of you, this journey would be different.

First, I would like to express my gratitude to my supervisor, **Tamalika**. I still remember the first time I went to your office with anxiety, you gave me one tweezer and asked me to take one substrate from one box to another, and I did, then you told me, "you can pick up the substrate, so you can do PhD too." which encouraged me a lot. Time flies, it has been seven years since I join your group. I appreciate all the support you have given to me. Thank you for your faith in me, I started my PhD without a related background, but you always believed me I could do it well. You often read papers with me and help me understand the physics behind the sentences. You are always excited about my new experimental results. Thank you for your considerable efforts to push our work into publishing. Thank you for being so helpful when I decided to come back to Groningen to finish my thesis. Without your support and efforts, this thesis could have been delayed even more. Except for the research, you take care of all your students; that's why Tamspin is such a close family. My deep-heart gratitude for your non-stop care during my pregnancy and my motherhood. I cannot remember how much support and help you have provided to me; thanks a lot. No matter where I go in the future, your love and encouragement will always be remembered.

My acknowledgment to **Thom, Bart (Kooi), and Johnny**, thank you very much for being my reading committee members, and for the valuable comments you provided. **Thom**, thank you for providing me with the internship opportunity in your group when I tried to look for a position at the university. Thank you for giving me the offer to apply for the CSC scholarship; without this, I could not have had the chance to have my PhD life in this university. **Antonija, George**, thank you for being a part of my defense committee. **Erik (van der Giessen)**, thank you for chairing my defence.

I would like to thank the professors/PI of the FND group. **Bart (van Wees)**,

**Casper, Marcos**, and also **Tamalika**, thank you for managing the group, providing various experimental platforms, and creating a great atmosphere for research. And thank you for all the discussions during the group meetings. I also appreciate all the casual chats with you during the group activities. **Gerrit**, thank you for your series of lectures about spintronics. I enjoyed the chat a lot during your stay in our office.

**Beatriz**, thank you for being my second supervisor and for the opportunity to work in your PLD lab. I appreciate your encouragement during my stay in the SSME group, I was always enthralled by how you encourage students.

I acknowledge my collaborators for their contributions. **Maxim, Evgenii**, and **Maria**, thank you for the important numerical simulations input. **Maxim**, I learned a lot from you from the discussions. I still remember how you explained the Landau theory equations step by step to us; I forgot my scaring of the complicated equation at that moment. **Evgenii** and **Maria**, thank you for performing the simulations and explaining the various questions we asked. Besides the research discussion, I also enjoyed a lot of social chatting with you. **Maria**, also thank you for your advice and information about how to raise a baby, which gave me a lot of confidence. **Karsten** and **Liang**, thank you for the DFT calculations and the discussions. Your theoretical insights inspired us to understand the experimental data more deeply.

I express my gratitude for the technical support. **Johan**, thank you for managing and maintaining the labs and cleanrooms; you are a great manager. Thank you for correcting my English and encouraging me. I also appreciate you staying with me to figure out the rules for safely working in the lab when I was pregnant. I am grateful for your support and concern for my PhD and motherhood. **Jacob**, many thanks for your good care during my internship in the SSME group. You are such a helpful person and full of patience; you are not only a technician but also full of passion for research, we can always discuss with you all the problems we have met. Thank you so much for your support and help on XRD, PPMS, and MPMS measurements during my PhD. **Martijn** and **Hans**, thank you for your help with solving various problems in the Nano lab, the wire bonding for my devices, and the maintenance for the PLD system. **Martijn**, also thanks for the specially designed stage for PLD, which is convenient for me. I Wish you all the best in Norway. **Hans**, I enjoyed the chats with you about your yearly family camping holidays and was touched by your lovely kids. The photo taken with you is a good proof to show my friends how tall Dutch people are. **Tom**, thank you for solving my computer problems. Also, thanks for your concern about my baby. I liked the fresh vegetables and fruits you brought from your garden. **Arjun, Herman, Frits**, thank you for your efforts to fix different kinds of technical issues. Thanks also give to **Anna, Hilda, Marleen**, for your administrative support.

I had a great and memorable time with my colleagues and friends I have met over these years. They helped or inspired me in many aspects during my PhD, I

would like to express my acknowledgment to them.

**Crystal** (思宝), we spent our entire PhD life together. More than that, having you with me was one of the luckiest things during my PhD. You are such a caring person; it was your kindness and encouragement that released my fear of the new environment at the beginning of my PhD. Although we have supported each other in all aspects over the years, in my respect, you supported me much more. When I got confused with the measurement settings, you were always there to help me figure out the problems. When I was stuck with understanding physical concepts, you always helped me check the lectures and explain them to me. In most social activities, you were always there with me, reducing my anxiety about communication. Thank you so much for your company. Thanks for being my paranymph, it means a lot to me. Your home has become the most comfortable and relaxed place these days, I feel no guilty whenever I come to bother you. **Wytse**, many thanks for all kinds of support and help you and Crystal have provided in the past years. Whenever we needed a car, you were always available to help us. Thank you for carrying us home from the hospital when Zhilan was born. Thanks for all kinds of deadlines you have given to my thesis writing. Special thanks for your non-ending help with the adjustment of the thesis format, I could not imagine what kind of mess it will be without your help. I wish you reach the life you want very soon: a big house with a farm with different kinds of animals. Dear Crystal and Wytse, wish you happiness, I look forward to your wedding in China.

**Arijit**, thank you for being so helpful from the beginning of my PhD until the end of my PhD. You were more like a daily supervisor to me at the beginning of my PhD, and taught me about everything related to complex oxides and spintronics. We spent a lot of time together with depositions, device fabrications, and measurements. I was greatly inspired by your passion for research and the endless ideas in your mind. Your quick understanding of papers and remembering thousands of papers and authors always shocked me. Thank you for all your help and input for my research. I am grateful for all your suggestions about the future. The cheerful time we had together during the dinners, group activities and conferences will never be forgotten. I hope you reach your dream life soon.

**Job**, the various office activities with you and Crystal were so cheerful and memorable when you joined our office as a master student. You are so talented with presentation and learning. I liked all the scientific and non-scientific conversations with you. The discussions about art, education, and politics helped me understand Dutch culture more. You always have critical thoughts and a quick understanding of the observed data, it was always enjoyable to discuss with you. It was also a pleasant time that we worked together on the PJ samples. Thank you for all the discussions and support for my research. It is my pleasure to have you and Crystal being my paranymphs, the chat with you and Crystal called me back to our happy office time.

I wish you and **Mirthe** a wonderful wedding and happiness forever.

**Anouk**, you are such a talented and hard-working person, you are the first one to study the neuromorphic topic in the group, and you have obtained so many nice achievements (I am curious how thick your thesis will be ). Thank you for the extended work on SRO, I learned a lot from your studies. Thank you for being so kind and helpful with everything. Thank you for double-checking my Dutch summary. You are the slimmest but strongest girl, I was always shocked by your superpower. You deserve the best; now you only need a bit of good luck, which is already coming to you. **Azminul**, you have a very thorough understanding of physics, and your presentations about the physical concepts were so enjoyable. I appreciate your active questions in the group meetings and discussions. Your passion for science is really infectious. You are also a person full of humor, it was relaxed and enjoyable to talk to you. All the best with your PhD. **Perihan**, you are an amazing person with many hobbies. Thank you for your handmade gift and delicious salads. I enjoyed our chat about different aspects. Good luck with your career in Turkey. **Arjan**, we got to know each other in the SSME group, then we both joined Tamalika group and had our PhD life here. You always tried to help me work more efficiently with Origin, which indeed saved me a lot of time and inspired me to use the software in an efficient way, I am grateful for that. We also had lots of chats about many topics. You are a person with many interesting thoughts, and the conversations with you sometimes opened a new world for me. The dinners and hotpots we had together were always cheerful. **Wissem**, you always have a big smile on your face. Thank you for inviting us to your lovely home. I enjoyed a lot of your discussion about SRO studies. **Adam**, I enjoyed working with you, thank you very much for your contribution to SRO/SMO studies. All the best with your PhD research. **Ishitro**, I enjoyed chatting with you very much. I believe you will finish your master study with fruitful results with three daily supervisors. **Eric**, thank you for your help and support at the beginning of my PhD. My thanks also express to other former Tamspin members: **Sander, Miina, Yahia, Eswara, Symen, Mihai, Elisabeth, Vincent, Bart Zillen, Retno**, etc.

**Jing**, I was always attracted by your presentations and laughing. Thank you for sharing your study method and tips, and also for the discussion about physics. I am grateful for our girl chat together with Crystal, it helped me to develop a peaceful life, and to understand things from different aspects. I am grateful for your effort to organize our yearly trip. I enjoyed our trips to Ameland and to Paris a lot. I look forward to our golden trio meeting in Dublin next month. **Lei**, thank you for your kind help with MPMS and PPMS at the beginning of my PhD. The dinners and board games we had together at your home together with **Juan** were delightful. **Tian**, thank you for the help with the Tesla setup in the past years. You have very sharp thoughts in many aspects, and I also learned a lot from your deep study of invest-

ment and stocks. Thank you and **Dong** for hosting us last year, and for the nice food. **Dong**, also thanks a lot for caring about Zhilan's documents. I wish you two a prosperous and happy life. **Xiangyang**, thank you for your efforts on the PPMS setup. I always benefited from our chats: useful apps, stocks, food, etc. Thank you for all kinds of suggestions. **Freddie**, thank you for being so helpful with the programming, I appreciate your help with the Python code for data analysis. **Anna**, I liked our small walk on Vlieland. I admire your ability to manage many tasks together. I enjoyed our office dinner time. Maybe you can keep the tradition. **Carmem**, Thank you for always being so helpful and supportable. I appreciate that you always asked me if I need help with thesis writing. You are an amazing person and full of confidence, and you have been a model for me. My best wishes to you and **Obed**, good luck with your new career in Cambridge. **Xu, Geert, Frank, Jan, Sytze**, thank you for organizing all the memorable group activities and group dinners. **Talieh**, you are such a talented and hard-working scientist. I appreciate all the chatting with you; your drawing and presentation skills were amazing. **Feitze**, you are a warm person, thank you for your concern and encouragement through WhatsApp. **Dennis**, the small chat with you in the corridors was always cheerful. **Alexey**, thank you for your technical support and scientific discussions. My acknowledgment also goes to other (former) FND members: **Cédric, Aaron, Tamás, Joop, Boxuan, Rafael, Julian, Pep, Weijia, Ludo, Kumar, Christian, Mallik, Madhu, Siddhartha, Tom Bosma, Jorge**, etc. I really appreciate all your discussions and support in the past years. It was nice to work with all of you.

Thanks also go to the other colleagues and friends at Zernike institute: **Aisha**, thank you for being my daily supervisor during my stay in the SSME group. You took good care of me in all aspects and encouraged me to confidently express myself. I was grateful for your help in correcting the proposal for CSC and preparing the related documents. **Guowei**, thank you for your help at the beginning of my stay in the SSME group. **Mart**, I had two times wonderful conference experiences with you: One was in Ameland, where we watched many beautiful birds beside a lake. The other one was in Corsica, where I saw the most beautiful galaxy. You organized both activities, thank you very much. **Silvia**, thank you for your help with MPMS. **Ying fen**, thanks for all the discussions about complex oxides and PLD. The conferences we went to together with **Mart, Jun, and Qikai** were so memorable. **Qikai**, thanks for your discussion and help regarding XRD measurements. **Silang**, I enjoyed our climbing course, thanks for being my climbing buddy. We had similar anxiety about thesis writing, and we both believed we would become rich once we finished the PhD. Good luck with your writing, we almost reach there. **Hong**, I liked your passion for literature and enjoyed your thoughts on specific literature. The conversations with you actually helped me understand myself more. **Henk**, it was always cheerful to say hi to you and have a small chat when I passed by the

corridors. **Joshua**, I enjoyed our discussion about the posters and Skyrmion project in Vlieland. **Jin**, thanks for sharing your thoughts about PhD and giving me a lot of suggestions. **Laaya**, we shared an office for a short time, but we had quite a nice time together, thank you for your suggestions about PhD life. **Henriet**, thanks for your kind administrative support during my stay in the SSME group. **Johan Kuiper**, thank you for the helium supply and always helping me push the big vessel across the door. **Arunesh**, we had many nice conversations together. thank you for your encouragement, and for giving me suggestions about thesis writing. **Qihong**(老乡), I was so excited when I found you and me are from the same county. I enjoyed our dinner parties very much: cooking familiar dishes, Singing old songs after dinner, playing Mahjong until midnight, etc. Your humor was so infectious. **Minpeng and Yuru**, thanks for all the wonderful time we spent together, you both are very good caring people, best wishes to you. **Puhua**, thanks for waiting for me together to submit the thesis. Thanks also go to **Xiaoli, Ying and Mokun, Jian and Shuyan, Liany and Ali, Paul, Heng, Hui, Xiaotian, Daniel, Jordi, Machteld, Anil**, I enjoyed my time with you.

I also express my gratitude to the other Chinese friends I have met during my time in Groningen. **Yuchen, Jinling, Shaoyu and Qian**, I enjoyed our chat in the canteen during lunchtime, **Yuchen** thanks for giving me tips about cooking our hometown cuisine. **Qian**, thank you for taking the memorable photograph for Zhilan. **Chongnan**, thanks for all the conversations about the future work, I enjoyed it a lot. **Fangfang, Yanan, Yingfen, Jing (Chen), Qi**, thanks for all the dinners and girl chat at Crystal's home. **Charlotte Lo**, thank you for good caring for Zhilan in the daycare. **Yuanyuan and Liqiang**, thank you for sharing the experience of taking care of babies. It was so lovely when Zhilan and Youran played together. The lovely time with **Youran** and **Xialin** this year released my missing to Zhilan. **Yuanyuan**, you are a person who managed your career and family really well. I was deeply motivated by you. I enjoyed our chat about marriage, life, and work. Thanks also go to **Chengtao, Xingchen, Rui and Pengyu, Xinkai, Qiuli, Yanxi, Jingjin and Xiaoyue, Yafei Guo and jiuling Li, Luo Ge, Yuzhen Qin, Wei Zhang and Ying Pan, Jie Gao, Ming Shi, Yi Yu, Yichen and Haoqi, Shun Fang, Daozheng Yang, Xiu Jia, Yingying and Wenze, Fan Xu, Chen Yao, Yangyang Guo, Qiang Tang, Xiaohua**, and the friends I might forget to mention here, I enjoyed my time with you; you enriched my life in Groningen.

**Xinghua** (星星), we have known each other since our teenage age. No matter where we are, we always keep in touch closely all these years. We share our happiness and sadness in all respects and encourage each other. You are talented in managing and communication, I always believe in you. I wish you, **Yang** and little **Yuanyuan** happiness.

In the end, I want to thank my family.

**Gang**, thanks for being such a good husband and father. Because it is you, I never worried about our future, which is why I came to Groningen together with you. Thank you for being always with me and supporting all my decisions. Thank you for taking good care of me, my requirements always go first. Thank you for your love and patience. I can always be lazy at home and you will take over most housework. When I was busy with measurements, you always took good care of me and stayed late with me. I appreciate whatever you have done for me. Our little princess **Zhilan** joined our family during my PhD, it was happy but challenging. But we managed everything and had so many memorable times. Thank you for being so responsible for our family; I feel so lucky to have my life with you. Groningen is not only a city where we have stayed but also a witness to our happiness and love. **Zhilan**, my sweetheart, you are the best gift from God. Taking care of you and watching you grow up are the happiest things in the world. Leaving you with your grandparents this year was the hardest decision I have made; luckily, we can still see each other and express the missing through the daily video call. When you grow up, let's come back to visit Groningen, the city where you were born and where the story started.

爷爷奶奶，感谢您将我们姐弟三人抚养长大。爷爷，感谢您每次电话里的再三叮嘱与鼓励，正是因为您时常的叮嘱，才促使我一直保持着学习的态度。父亲，感谢您多年的辛勤付出，您这一生大概就是在向所有人证明“人活着就是为了争口气”。小时候所有人都说你一拖三很不容易，长大后才有真正理解你的苦。感谢您再苦再累都不曾放弃我们，您无疑是最伟大的父亲。您这些年的坚韧，都深深的激励着我往前更进一步。往后余生，换您的孩子们来守护您。叶爸，叶妈，感谢您对我和叶刚这些年在海外求学的支持。叶妈，感谢您在我生产时从国内过来悉心照顾我和芝兰。今年将芝兰留在家里，感谢您们对她的悉心照顾。正是有你们对芝兰全心全意的爱，才让我们放心在外工作。弟弟妹妹，我有时会反思小时候没有尽到做姐姐的责任，小时候欺负你们的画面偶尔还会想起。有时也会想，要是以前多花点时间叮嘱你们好好学习，辅导下你们功课，是不是你们都会有机会走进大学校园，而不是十几岁背井离乡去打工。没将我们打倒的苦难终把我们变得强大，欣慰的是我们都有凭自己的努力在让人生更精彩，未来，也一定会更好。

有时候会想，是什么支撑着我在求学的道路上一直走到现在。大概就是中考时全家人都将自己碗里的鸡蛋给了我，是快高考时父亲托人买的生命一号（这东西没用，但这不是重点），是大学时弟弟妹妹寄来的生活费，是老公的无条件支持，还有从小到大遇到的恩师的额外照顾。感恩求学路上遇见的所有人，我将继续前行。
