Stellingen

1. A spontaneous breathing trial should without pressure support should be performed daily - *This thesis*
2. Children are not little adults - *This thesis*
3. Infants and young children do not breathe through a straw - *This thesis*
4. Ventilation liberation using a spontaneous breathing mode is safe and should be stimulated - *This thesis*
5. Advanced respiratory monitoring is the future for pediatric intensive care - *This thesis*
6. Much is known in pediatric ventilation liberation, more is unknown - *This thesis*
7. Lung aeration is not gravity dependent but is homogenously distributed during spontaneous breathing - *This thesis*
8. The pediatric patient should dictate the ventilator instead of the opposite - *This thesis*

   ‘Mooie figuren zijn goede figuren’ (*dr. M.C.J. Kneyber*)
9. ‘Ik ruik drukinkt’ is anno 2022 nog steeds actueel *(Prof. dr. A.B.J. Groeneveld)*
10. (Chef) Meten is weten
11. Work hard, play hard(er)
