Acknowledgements

It is the time for me to look back at the life in Groningen, the Netherlands, at the moment when I am completing the thesis. I have enjoyed so many beautiful sceneries in this flat country; the view of tulip lands, windmills, Warden Sea and islands will never be erased from my memory. Most importantly, I have met so many friendly people who made my life in Groningen more joyful and also encouraged me to overcome all the difficulties in my PhD pursuit. I appreciate all the help they provided to me, and I would like to express my sincerely gratitude to them.

First and foremost, I would like to express the deepest gratitude to my promoters, Prof. Lubbert Dijkhuizen and Prof. Johannis P. Kamerling. Thank Prof. Lubbert Dijkhuizen for providing me the opportunity to work in the Microbial Physiology group. I will never forget that he saved me from a desperate situation without hesitation, when I almost lost all the confidence in research and even doubted about my future. I cannot imagine how I could have finished my PhD study and this thesis without his valuable support. My life would be completely different without his help. I am deeply impressed by his intelligence, enthusiasm and kindness. The moment that he helped me out by working day and night on every stage of my PhD study will be kept in my mind forever. I enjoyed all the inspired work discussion with him. I appreciate all his kind guidance and enthusiastic support which made my PhD fruitful. It is an unforgettable memory for me that I have met him in my life. To my promotor Prof. Johannis P. Kamerling, I am truly grateful for his kind guidance and support during my PhD study. He is always willing to help and encourage me with smiles. I am greatly impressed by his profound knowledge, critical attitude and enthusiasm for research. Having him as my promotor, I learned and improved a lot in not only the academic knowledge but also the attitude towards science, which will be a great fortune in my future career. I appreciate all the time and effort he devoted to revising the manuscripts, as well as, the valuable discussions and suggestions he provided to me. Both my PhD study and the thesis would not go so smoothly and reach this stage without his valuable input. I would like to express my deepest gratitude to him, and I will treasure all that I learned.

I would like to give my appreciation and thanks to my daily supervisor Dr. Justyna M. Dobruchowska. She is really friendly and helpful to me. Thank her for

all the help with structural analysis of carbohydrate and the patient explanation. I really enjoyed the time that we spent together. With respect to carbohydrate structural analysis, I would also like to thank Dr. Gerrit J. Gerwig for providing me the help with methylation analysis. He guided me through the protocol so many times, step by step, and hand by hand. I enjoyed every minute when we worked together. His help with the translation of my thesis summary in Dutch was appreciated gratefully. I would also like to thank Dr. Sander van Leeuwen, Geralt ten Kate and Peter Sanders for their help with carbohydrate analysis. They were always willing to answer every single question from me and provide lots of great suggestions. Grateful acknowledgements go to Albert Woortman (Macromolecular Chemistry) for the help with size determination of α -glucan polysaccharides.

My grateful thanks go to Dr. Tjaard Pijning. His valuable suggestions on elucidating the effects of glucanucrase mutations are highly appreciated. His comments on the manuscripts helped me a lot. I would also like to thank him for the help with the beautiful protein structure figures in my thesis. I would like to acknowledge Dr. Cesar A. López for the help with the docking studies.

I would like to thank the members of the reading committee Prof. M.J.E.C. van der Maarel, Prof. D.B. Janssen and Prof. T. Desmet, who devoted their valuable time to reading through my thesis and providing comments on the thesis, and approved the thesis for public defence.

To my officemate Pieter, I really enjoy sitting in the same office with him. He is always very kind and provides technical support in the lab, which made me more efficient. I appreciate all the help from him and all the time we spent together. I am glad that our project of duplicating plants is going well.

I would like to thank Yuxiang for the help in the lab and all the inspiring discussions on the work. My thanks also go to Huifang for all the discussions on projects. I appreciate the help from Joana for her valuable comments on some of the manuscripts. I gratefully acknowledge Elena, Lara, Ana, Mark, Mirjan, Hans-Jörg, Marnix, Veronica, Andrij, Thai, Danane and Santiago. I will never forget their encouragements when I was experiencing the toughest time in my PhD study. Even though I suffered a lot in the first two years, I enjoyed being one of

them. I would like to express grateful thanks to all previous and present MicFys members (including the ones mentioned above): Hans, Robert, Gerda, Alle, Maarten, Jelle, Jolanda, Alicia, Evelien, Rachel, Cecile, Vincent, Laura, Tim, Markus, Hien, Rivca, Sahar, Sebastiaan, Ahmed. It is a great honor for me to be one of the MicFys Group. I could not make it without the great support from them. Thank Yuxiang and Ana for being my paranymphs, and Lara for sharing me with so much information for PhD defence. Thank Yuxiang, Huifang, Hien and Markus; the leisure time we had during lunch was great. I would like to thank Javier and Alberto (Norden Soul) for the help with the cover design. Marta from Aquatic Biotechnology and Bioproduct Engineering is also acknowledged.

Grateful thanks go to our secretaries Bea and Manon for their very kind help. I would also like to give my thanks to Engel Vrieling for his help in the registration and providing me with helpful suggestions.

I should not forget to present my appreciations to Chinese Scholarship Council (CSC), who funded me to study in the Netherlands. I also appreciate the efforts of the Education Section of Chinese Embassy in the Netherlands. I would also like to thank Prof. Weifeng Liu and Prof. Guanjun Chen at Shandong University for their help during my master study. Hui Wang at the Graduate School of Shandong University is appreciated for her help during the CSC grant application.

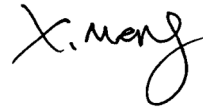

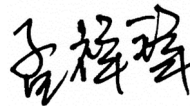

I am grateful to all my Chinese friends and GBB colleagues: Bo Li, Wenjuan Ma, Yang Li, Xiaoguang Du, Ranran Li, Dongdong Mu, Jianlei Zhang, Nuan Yang, Miaozi, Zhang, Wenwen Diao, Bian Wu, Jianjun Tang, Feng Hu, Yanping Geng, Qiuyan Yang, Nana Yu, Youtao Liu, Xuwen Zhang, Min Wu, Mengqiu Ge, Jiawei Chen, Di Wang, Xiaoyu Ruan, Yuxi Tang, Fei Deng, Yirenjile, Xinchun Fan, Peng Peng, Wenjun Wang, Tao Zhang, Jinfeng Shao, Qian Li, Haojie Cao, Yanglei Yi, Jingjing Deng, Xin Zhao, Boquan, Liu, Juanjuan Su and so on. Thank them for all the time we had together. Having them around relieves my homesickness. I wish all of them good luck in their life.

To my beloved Xiaodan Li, I cannot thank her enough for supporting me for everything. With her encouragements and faithful support, I overcame all the failures and difficulties. Even though we are far from each other, she always understands and forgives me for less care that I gave to her. I would express not

only thanks but also sorry to her. “Sometimes life can be deceiving. But I will tell you one thing. It is always better when we are together.” I am lucky to have her in my heart. Sincere thanks also go to her family for their understanding and supports.

I especially want to thank my parents, sister, brother-in-law, brother, sister-in-law and nephews. Thank them for their unconditional cares, supports, encouragements and understanding. I am grateful for all the other members in our big family, my grandparents, uncles and aunts for all the support they provided for my study and our family.

Lastly, I would like to give my thanks to all the other people who have helped me. Best wishes to all of you.

A handwritten signature in black ink that reads "X. Meng". The letters are cursive and fluid.Handwritten Chinese characters in black ink, which appear to be "孟祥宇" (Meng Xiangyu).
