Acknowledgements

Many people have helped me to reach the end of this thesis, I would like to thank them all.

A special place belongs to my supervisors, Leo and Louis. From you I have learnt about the fascinating field of evolutionary genetics. Leo, thank you for being so patient with the never-ending versions of my manuscripts and for your fast corrections. Louis, you have always helped me to take a more positive look at my results and comments of the referees. I thank you both for your support, especially during the extra years it has taken me to reach the end of this book.

The research presented in this thesis would not have been possible without the help of many people. I would like to thank the co-authors of the chapters and publications for their direct contribution and input. During this time, students (Jörg, Iris and Veronie) have helped me collect some of these data and often had to spend long days and weekends observing and collecting wasps. I would also like to give special thanks to those that have supported me with technical help: Joop, always ready to listen and have a nice chat, thank you for taking care of the wasps during my holidays; Rense for molecular advice and AFLP amplification. Together with Anne I discovered the way into proteomics.

The evolutionary genetics group has hosted me during this period, providing me with discussions, support and fun. Special mentions go to Albert for fruitful discussions over my research; Rinaldo for the long hours spent together in the lab; Bernd for help with the bioinformatics tools; Pim, Marielle, Willemien, Evelien and Desiree for the nice moments as office-mates; Saleta for the sparkling chats in the lab and corridors; Emma and Anneke for always helping with a smile; Bart for good advice and support.

All these years would not have been the same without all the nice moments spent with my “groninger” friends: Tim, Doretta, Marian, Niko, Antonella, Delphine, Teresa, Magdalena, Daan, Barbara, Bernd, Irene, Gudrun and Thomas. Aitana, we started together in Groningen, we shared many discussions, meals, fun, good and bad moments, but the most important: you became a friend I can always count on. Having such an international group of friends has been very enriching, but the drawback is that almost all of you have left Groningen by now. I hope you’ll always find time to come back and visit us.

To my family in Alicante, especially my parents, who have always supported me from afar and were always ready to come for a visit. To my Dutch family, thank you for your warm welcome and for always being the helping hand I needed. This book is specially dedicated to my boys. Ruben, without your unconditional support I would never have finished this book.

Gracias a todos!
