Curriculum Vitae

Irene Mateo Leach was born on January 16, 1977 in Alicante, Spain, where she grew up. She received her MSc in Biology at the University of Alicante and during this period she had the opportunity to spend several months in France at the University François Rabelais, Tours, and the University Paul Valéry, Montpellier, as part of the Erasmus European exchange program. During this time she developed an interest in population biology. Back in Alicante, she had the chance to participate in two research projects on the biodiversity of halophilic archaea at the University Miguel Hernández. She then started a PhD project on the genetics and evolution of reproductive strategies in the parasitoid wasp *Venturia canescens* in the Evolutionary Genetics group at the University of Groningen, the Netherlands. Currently she is working as a postdoctoral fellow in the Experimental Cardiology group at the University Medical Center in Groningen.
