The Effect of Temperature on Sex Determination

Robert Bosch Stiftung

This study was funded by the Robert Bosch Stiftung, Germany.

The research has been carried out in the Theoretical Biology and Evolutionary Genetics groups at the Centre for Ecological and Evolutionary Studies (CEES) of the University of Groningen, The Netherlands. The printing of this thesis was partly funded by the Faculty of Mathematics and Natural Sciences of the University of Groningen.

Contents

Preface	7
CHAPTER 1	9
General introduction and thesis overview	
Part I: Theoretical Approach	33
CHAPTER 2	35
On the co-evolutionary dynamics of environmental- and genetic sex determination	
CHAPTER 3	53
Divergent evolution of sex determination in the snow skink <i>N. ocellatus</i> : a theoretical analysis	
Part II: Empirical Approach	71
CHAPTER 4	73
Temperature and fitness of houseflies with different sex determining factors.	
CHAPTER 5	93
Does temperature affect the sex ratio and frequency of intersexes in the housefly, <i>Musca domestica</i> ?	
CHAPTER 6	105
Are autosomal sex determining factors of the housefly (<i>Musca domestica</i>) spreading north?	
CHAPTER 7	123
Climatic variation and the geographical distribution of sex determining mechanisms in the housefly	
CHAPTER 8	141
A microsatellite linkage map of the housefly, <i>Musca domestica</i> ; implications for recombination rate and sex chromosome evolution	
References	157
Summary and Conclusions	175
Zusammenfassung und Schlussfolgerungen	183
Samenvatting en conclusies	193
Acknowledgements	203
Curriculum Vitae	207
