Molecular Dynamics Studies of Entangled Polymer Chains

Monica Bulacu

- Front cover:** Illustration of the entanglement among four polymer chains selected from a dense ensemble of chains, at an arbitrary moment during the molecular-dynamics simulation.
- Back cover:** Surface plot of the combined bending-torsion potential V_{CBT} used in this thesis to control the chain stiffness along the polymer backbone.

RIJKSUNIVERSITEIT GRONINGEN

Molecular Dynamics Studies of Entangled Polymer Chains

Proefschrift

ter verkrijging van het doctoraat in de
Wiskunde en Natuurwetenschappen
aan de Rijksuniversiteit Groningen
op gezag van de
Rector Magnificus, dr. F. Zwarts,
in het openbaar te verdedigen op
vrijdag 18 januari 2008
om 13.15 uur

door

Monica Iulia Bulacu

geboren op 29 juni 1974
te Boekarest, Roemenië

Promotor: Prof. dr. ir. E. Van der Giessen

Beoordelingscommissie: Prof. dr. D.N. Theodorou
Prof. dr. B. Thijsse
Prof. dr. S.J. Marrink

ISBN: 978-90-367-3307-6

Contents

1	Introduction	1
1.1	Chain dynamics in entangled polymer ensembles	2
1.2	Bridging the gap between polymer physics and continuum mechanics . .	4
1.3	Overview of the thesis	8
2	Basic concepts of polymer physics	11
2.1	Polymer chain topology and characterization	12
2.2	Isolated polymer chain models	13
2.2.1	Freely jointed chain (FJC)	14
2.2.2	Freely rotating chain (FRC)	15
2.2.3	Rotational isomeric state (RIS)	15
2.3	Chain dynamics in polymer melts	16
2.4	Glass transition	19
2.5	Adhesion of polymers	21
3	Computational model	23
3.1	Molecular dynamics	24
3.2	Coarse-grained models for polymers	24
3.3	Equation of motion	28
3.4	Force field	28
3.5	LJ units	33
3.6	Integration scheme	34
3.7	Thermostats	35
3.8	Sample initialization	36
3.9	Molecular dynamics computer program	38

4	Polymer melt dynamics	39
4.1	Introduction	40
4.2	Computational model	42
4.3	Sample preparation	46
4.4	Results and discussion	49
4.4.1	Static properties	49
4.4.2	Dynamic properties	54
4.5	Conclusions	67
5	Glass transition	69
5.1	Introduction	70
5.2	Model and simulation method	72
5.3	Results and discussion	75
5.3.1	Static properties	75
5.3.2	Dynamic properties	80
5.4	Conclusions	91
6	Polymer–polymer adhesion via connector chains	93
6.1	Introduction	94
6.2	Model and simulation method	97
6.2.1	Interaction potentials	98
6.2.2	Sample preparation	102
6.2.3	Tensile debonding MD simulation	103
6.3	Results and discussion	106
6.3.1	Influence of connector chain architecture on adhesion strength . .	109
6.3.2	Influence of temperature and pull velocity on adhesion strength . .	118
6.4	Conclusions	121
7	Concluding remarks	123
7.1	Summary and contributions	124
7.2	Further research directions	126
	Bibliography	129
	Publications	139
	Samenvatting	141
	Acknowledgements	145
