ON THE MOBILITY OF BIOMOLECULES
a fluorescence microscopy approach

Geert van den Bogaart

Cover: artist impression of a laser-scanning confocal microscope. The scene was rendered by Geert van den Bogaart using the **P**ersistence of **V**ision Ray-tracer software (POV-Ray, <http://www.povray.org/>). The model for the microscope is from Valdemir Carrara ©2002 (<http://valcar.net/>); the tubes were created using the MadPipe-macro from Gilles Tran ©2004 (<http://www.oyonale.com/>).

University of Groningen
Zernike Institute
for Advanced Materials

This Ph.D. study was carried out in the Biochemistry Department of the **G**roningen **B**iomolecular Sciences and **B**iootechnology Institute (GBB), and was financially supported by the Zernike Institute for Advanced Materials (University of Groningen, the Netherlands) and the Netherlands Science Foundation (NWO, grant number ALW-814.02.002).
