Acknowledgements

Finally I have reached the end of my PhD journey. From China to the Netherlands, I experienced a sizable “shock” in both culture and the way of how to conduct research. Without many people who gave their support to me in various ways, I would not have recovered from the “shock” and this thesis would not have been possible. To these people I would like to convey my heartfelt gratitude and sincere appreciation.

First and foremost, I would like to express my gratitude to my promotor-prof.dr.W.H.van Gilst. Dear Wiek, thank you for your constant support in my scientific research in the past five years which definitely encouraged me. Your expert guidance, stimulating encouragement and valuable suggestions have greatly contributed to this thesis and helped me round off the PhD research successfully. With your wisdom, efforts and enthusiasm, many obstacles in both scientific and life areas have been overcome smoothly. I deeply appreciate you. With your creative ideas, we have built up the collaborative work with China-Harbin Medical University. I hope we have a promising future in the collaborative network between China and the Netherlands.

My warmest thanks also go to two of my co-promoters: Dr. R.G.Schoemaker and Dr. A.J.M.Roks. Dear Regien, you assisted me from the second year of my PhD project. My first paper would not have been written without your efforts. Also, without your translation of the summary into Dutch, this thesis could not have been finished. Your expertise in animal experiment substantially assisted my research. The weekly discussion of study with you added vigorous components to this thesis. Thank you for your help in the study, correction of the manuscript and the Dutch translation.

Dear Anton, you stepped into my thesis work in the last two years of my PhD. I appreciate your work attitude and your work efficiency. Your activity, creative suggestions and broad knowledge profoundly stimulated my fascination for scientific research. What I learned from you is your wisdom, your patience and your humour. I really enjoyed chatting with you in the bar. Our journey to Berlin was unforgettable, tasting Italian food, Mexican food and drinking the refreshing brewed beer..., all of these are lasting memories in my mind. My best wishes for you and Francesca.

For the reading committee, Prof.dr. G. Navis; Prof.dr. F. Zijlstra. Thank you for your critical reading and your membership of the reading committee. My special thanks go to Prof.dr.W.van der Giessen for your willingness to participate in the reading committee of my thesis and to attend the defence of the thesis here in Groningen.

APPENDIX

I give my great appreciation to Dr. René A.Tio. Without you I would never have been a PhD candidate in the Netherlands. I still remember that everything was out of order when I started my new life in Groningen in 2002. It was you who gave me solid assistance and helped me build up stem cell knowledge rapidly. Thank you for supervising the first year of my Ph.D. Furthermore, I would like to express my gratitude towards your wife for offering Lili a study opportunity at the beginning.

I would like also to express my sincere gratitude to Prof. dr. Rob Henning for introducing me to Dr. René Tio before I came to Holland. Actually you were the first real person with whom I had contacted in China initially. Thank you for giving me this opportunity!

I owe my sincere thanks to the people from Medical Biology, albeit I only worked there for one year. Marco Harmsen: Dear Marco, it was so nice to work with you. What I learned from you is not only the correct way to conduct research, but also your broad knowledge on stem cell lightening my mind. Your kind cooperation allowed many of my experiments to go smoothly. Thank you for all of your help. Dear Xavier, thank you for giving me such a lot of solid support in my research. What I learned from you is your expert technique and your kindness of helping other people. Best wishes to you and your family. Dear Henk, I could not have “survived” without your “EC medium”. Please accept my heartfelt appreciation for your help and your enthusiasm.

A special thanks also goes to Mrs. Riekje Banus from the GUIDE office: Dear Riekje, thank you for your help during my five years PhD study. I would also like to thank Prof. Lou F.M.H.de Leij and Prof. Sibrand Poppema for your great cooperation on the Third Dutch-Chinese Life Science Forum, which was successfully held in UMCG in 2005 and, further, the collaboration with Harbin Medical University in China.

For the work people from clinical pharmacology and cardiology, I would like to thank all of you who gave us (PhD) a comfortable work atmosphere in the department: Dick; Floor; Richard; Hendrik; Leo; Jan and Rob Visser (thank you for the help with financial problems); Adriaan; Peter Mol. I thank Ardy, Alexandra (thank you for your support at the beginning of my study) and Ellen for the daily help. Wessel, thank you for the technical support of my computer! Big thanks also go to our excellent technicians: Bianca, Alex (wish you veel success), Azuwerus (thank you for ordering all the materials I needed in my experiments), Maaïke, Jan, Janneke, Antoinet, Marry. I specifically want to thank Kristien for her great work on my first paper, I wish you lots of successes in your medical study. A special thanks also goes to Jacko. Dear Jacko, you are an exceptional colleague of mine, your substantial helps already make me treat you as a friend. I wish all the best to you and your family.

For the new technicians in Experimental Cardiology: Germaine, Annet, Silke; Linda, Inge, Janny. Thank you for your efforts for our new lab.

I have no words to express my thanks for my PhD colleagues. For the previous PhDs: I would like to thank Annemarieke, Els (thank you for your nice card and our volleyball match was unforgettable), Maria, Erik, Bart, Bas, Peter vd Meer, Peter Ochodnichky, Willemijn, Mirjam, Pim, Irma, Nadir, Irina, Hidido, Larissa, Liana, Sassa, Ruth, Daniele, Laura, Willem Peter, Anne, Bernadet (it was so nice to work with you as paranimfen of Ying's), Ying (you are the first Chinese friend of mine in this department, thank you for sharing the success and frustration, I wish you good luck in the UK). A special thanks goes to Annemarieke, thank you for showing me around in my first day in the department. Actually, my PhD work was based on your excellent contribution in the angiotensin-(1-7) field. I wish you all the best in the future! I would also thank my paranimfen: Dear Hisko, I am so glad to have met you during my PhD study, I wish you and Lian a fruitful future. Dear Daan, you are a "crazy" researcher trying all kinds of novel techniques. Please accept my best wishes for your future, and of course also for your coming wedding.

For the new PhD, Bo, Meimei, Maggie, Peter, Jardi, Maurits. I wish you all good luck in your PhD study.

I would like to express my thanks to my precious friends: Huadong and Frank, I really enjoyed our chatting time and tasting your elegant cooking and frankly talking. Thank you for being friends of mine. Dear James and Janine, It is my big pleasure to be a friend of yours. The time tasting your English food and culture was so fantastic. The time of visiting your parents was unforgettable. I wish you and your family all the best.

To Chinese friends in the Netherlands: with your friendship, the time in the Netherlands became joyful and memorable. Our celebration of the Chinese Spring Festival; BBQ party and bowling game were fantastic! Specific thanks go to my dear friends-Xiaoqin and Fuxin: the time with you let me feel so attached to my own family in China. I wish you great success in the US. My heartfelt thanks also go to close friends of mine: Xiaojin and Youping, Being with you let me go one step further to my hometown. Qianhui and Zongquan, we had such a wonderful time in France. Hongtao, Lina and Zhao yan; Lv bo and Meimei, thank you for all your help. There are many, many other Chinese friends who helped me and made my life in Groningen so enjoyable. Please forgive me for not mentioning all of your names individually.

最后，我要感谢我在国内的老师，挚友和家人：我事业的发展和我的恩师-陶天遵老师是分不开的，陶老师，您的教诲我将受益终生！能有您这样的导师是我一生的荣幸！

晓路，你是我这一生中不可多得的挚友，我们的友谊必将像美酒一样越酿越醇！大姐，二姐还有姐夫们感谢你们多年来对父母的照顾，能让我在荷兰无后顾之忧。我的爱妻-利莉：能遇见你是我们的缘份，没有你，我的生活是不能想象的。你是我一生的珍爱，我们将携手共同走过风雨和彩虹。岳父，岳母感谢您们把利莉带到了我的身边，同时也感谢您们多年来对我们的支持。最后我要感谢父母对我多年的养育之恩，没有您们的鼓励和坚定的支持，我绝没有今天的成绩。老爸，您精湛的医术使我对医学产生了浓厚的兴趣，潜移默化地影响了我的事业，这也必将使我在医学领域继续坚定的走下去。
