I would like to thank my promoter, Prof. H. Duifhuis for the support and advices provided throughout the duration of my Ph.D., as well as for the non-scientific moments that he had the patience to spend with me. Without your support and wisdom I would not have made it till the end and I was so privileged and proud for having you all the time on my side. I have always looked for your calm, as it is something that I never had in Holland, and always searching for. I would also want to thank you for giving me the opportunity of traveling to many places and meeting people who were notorious in my domain. I will stop here, just to follow my habit of keeping it short in writing.

I would like to express my gratitude to Prof. Ioan Grosu for making me understand the second phrase from “Stellingen”, for the time he spent with me, and for the good words when I needed them.

I am also indebted to Remco for providing the impetus for much of my work (Lucian Muresan was motivating me a lot in my continuous fight with THE SCIENCE). Esther, thank you very much for your corrections and advises as a researcher, and as a woman. Hans, thank you for keeping me furious the whole four years of my Ph.D. I was hoping at least for a short period break, but not a chance. Anita, thanks for the assistance in the data acquisitions.

I would also like to thank all my officemates: Sonja, Carlos, Gerke, Remco, Cris, Dave and Branislava. Thank all of you for the discussions that we had and your help. In the last two years I missed a lot the Croatian and Columbian alliance “against” Romanian. Cris, regarding the non-scientific part, thank you for having the patience of translating me all the Dutch “gngngk” and “chkui” words. I owe some special thanks to Sonja, Joyce, Martin, and Francesca that were helping me a lot to “accommodate” in my early stage in Groningen.

A warm thank you to all the people that I have worked with over the past four years and I forgot to mention in here, without whom none of this work could have been done, and especially to those who have patiently laid in the scanner for my experiments.

Even if the accommodations in Groningen are known for being the worst part of The Netherlands adventure, I was lucky to have had the best housemates: Alfredo, Katia, Stefano I had such a good time with you!

Amalia, Cristi, Anghel and Oana, the huge Romanian community from Groningen, thank you all of you for your friendship. Amalia, thanks for your smile, kindness, support and discussions that we had. Cristi, I always envy you for your “ardelean” calm, but you were the balance among us, always giving the peaceful answer. Oana and Anghel, thanks for the photo shootings walks in Groningen.

And now for the Romanian part, that I was missing so much in the last four years, but trying to be there at least for the important and planned moments…

Malina thanks for your friendship and for the strength you gave me, and of course, for the never-ending phone calls. I had the best time in Bucharest!

Laura thanks for everything you did for me all the time and for introducing me to people like Razvan. Razvan, thanks for your support and for remembering me all the time that Romania is the second language spoken in Microsoft. You are the IT master!!!!!!!!
Dr. Monica and Lucian thank you for the patience, calm and strength that you gave to me.

Dr. Aurelia, I was fighting with myself some times, but I made it to the end. Thank you for being my friend, for showing me the beauty of USA, and for the “tympani membrane”. Dan, thanks a lot, especially for the “American” language. Mulțumesc (thank you) to both of you for sharing with me such nice and funny moments.

I would also like to mention Prof. Ciobanu fam., always being there for me for scientific and non-scientific parts of my life.

Thank you to all my family members who were so close to me during this period and in particular to the “young” generation (Octav, Alina, Claudia, Victor, Valerica, Dan, Alexandru, Duta, Viorel, Nelu, Delioara, Oana, Carmen, Cristi). Octav, thanks for the Portugal part!

Lety, mama and tata thank you for your help, wisdom and patience with me. I know that you were not totally agreeing with a Ph.D. in a foreign country, but I had to try it for myself. Tata, the most difficult part of this Ph.D. was when I told you that my thesis’ subject is a super-, hiper- equation of first degree: $Y = X \beta + \epsilon$. Mama thanks for everything and especially for showing me only the beautiful part of the things. Mulțumesc frumos pentru tot ce ați făcut pentru mine! Lety, I appreciate that you were just my sister during this Ph.D., and not my psychologist, even when I had to learn from you a lot of STATISCS in English. Thank you!
