Once you write this part of the thesis you look back and you remember all the challenges of the PhD one had to take. It took all of you to conquer one or the other. I cannot express enough gratitude to all of you, I hope you are satisfied with my attempt.

Some people that enlightened my time in the UMM and UMCG are not mentioned here but I want to thank all of the people that daily crossed my paths and always took a moment.

Never enough can I thank my 'un-official' supervisor and now promotor Prof. Dr. Henri Leuvenink.

Dear Henri, at times that you were neither promotor nor supervisor you introduced me to the "team" and took me along. You were a selfless "un-official" supervisor, and you became a personal councilor and friend. Thank you for being around with a lot of patience and not minding endless discussions, even during coffee breaks.

My gratitude also goes to my second promotor Prof. Dr. Benito Yard.

Dear Benito, your open, enthusiastic and relaxed presentations during my medical studies and JSM time encouraged me to start my MD PhD in the joined laboratory of Nephrology and Anesthesiology. You took me along when my official promotor had left and supported me greatly to reach the destination German doctoral thesis and PhD. Thank you for giving me multiple opportunities to go abroad, letting me make my own experiences and putting people into my life that became very dear to me.

I would also like to express my appreciation to my third promotor Prof. Dr. Mariani.

Dear Prof. Dr. M. Mariani, thank you for the freedom and liberties you provided me with. I learned a lot and appreciate the support, particular during the second year of my PhD.

In 2012, I thought I will discontinue my PhD but then I met my new supervisor/ copromotor Dr. Michiel Erasmus.

Dear Michiel, you came out of the OR rolling down your sleeves and apologized for being two minutes late since you "just" had to put a mitral valve in. This and your enthusiasm made me change my mind, spontaneously. You have stayed that enthusiastic and put a lot of trust in me, thank you for your support throughout my time in Groningen.

R1 Two additional supervisors in Mannheim, I would like to thank here too, Prof. Dr.  
R2 Charalambos Tsagogiorgas and Dr. Jörg Krebs.

R3 Dear Babi, though I considered myself always more as an abdominal oriented  
R4 person you stepped in and made me change the cavity. You introduced me to the  
R5 field of research summarized in this thesis and contributed to the knowledge I have  
R6 achieved by now, thank you for that, in particular since you also had to take over  
R7 the supervision.

R8 Dear Jörg, you on the other hand though never officially supervising me stepped  
R9 a few times into the laboratory and gave me direction. You earned my respect by  
R10 having an admirable knowledge and the way you were willing to share it.  
R11

R12 I am very grateful to my reading committee Prof. Dr. H.A.M. Kerstjens, Prof. Dr.  
R13 J.L. Hillebrands, Prof. Dr. H.-P. Hammes for editing, correcting and evaluating this  
R14 thesis.  
R15

R16 Two special people, colleagues but also dear friends are Dr. Dr. Johannes Wedel and  
R17 Sophie Gärtner.

R18 Dear Johannes, while our time together in Mannheim was very limited due to  
R19 mostly different working locations it was a great joy to have you so much around  
R20 in Groningen. You are a great friend! You helped out in so many projects, kept me  
R21 entertained, and awake during long hours of the experiments. I hope our paths keep  
R22 crossing.

R23 Dear Söphchen, not only have you taught me the basis of the work in the laboratory  
R24 but you have also been a great friend. I wish I could have packed and taken you along  
R25 to Groningen! I miss the times we spent together in the laboratory crying because of  
R26 laughter of joy or pure disappointment, some challenges became bearable because  
R27 we shared them. Special were our coffees and barbecues in Heidelberg, sometimes  
R28 accompanied by your great family. You are regularly missed!  
R29

R30 I also want to thank the other good souls in the laboratory in Mannheim. Always  
R31 giving reason for a good laughter, and when help was needed there was always  
R32 someone available even after I had gone to Groningen. Thank you for your support  
R33 Jutta Schulte, Annette Breedijk, Katharina Prem, Silke Deiters, Paula Sternik, Renate  
R34 Stein and Dagmar Weber. It is always nice to come back to all of you!

R35 Dr. Friedrich Anger, Dr. Linda Mandel, Dr. Claudia Gasch, Bisirat Reeck, Prof. Dr.  
R36 Simone Höger, Prof. Dr. Dr. Neysan Rafat, Dr. Christoph Eisner, Tineke Kraij, Prama  
R37 Pallavi, Eleni Stamellou, Tineke Kraij and Dr. Markus Pukelsheim I want to express  
R38 my gratitude to for their support on projects, joined work and good times.  
R39

Three that had my back and were great friends are Bisirat Reeck, Dr. Anna-Katharina Doeffler and Catharina Wehner. Thank you for your support and the pleasure of your company.

I also appreciate the contributions of our collaborators in Mannheim, in particular the never ending efforts of everyone at Novaliq.

During my time in the Junior Scientific Masterclass and in the GRK 880-3 I met a lot of very nice, interesting and supportive people. Not everyone can be mentioned here but I would like to thank Prof. Dr. Hans-Peter Hammes for accepting me for the Junior Scientific Masterclass and within the GRK 880, after taking time to reason with me whether to dis-/continue my first doctoral thesis. Both, him and Prof. Dr. Han Moshage I would like to express my gratitude for supporting my time in Groningen. The coordinators of the GRK Prof. Dr. Jan-Luuk Hillebrands, Prof. Dr. Martina Schmidt, PD. Dr. Jens Kroll and Prof. Dr. Benito Yard I would like to express my gratitude to for their support, effort and enthusiasm during the GRK schools. The kindness and contribution of Prof. Dr. Hauw The, Dr. Crescje Wachters-Kaufmann and Siegrid Englert were admirable.

Three times I had the chance to attend the Transplantation Summer School in Groningen as participant and was twice taken along, for nice discussions and great food. I want to thank Prof. Dr. Willem van Son, the organization teams, Prof. Dr. Henri Leuvenink, Prof. Dr. Jan-Luuk Hillebrands, Prof. Dr. Marco Harmsen, Dr. Marc Seelen, Dr. Michiel Erasmus and last but not least Prof. Dr. Benito Yard for their enthusiasm and organization. Sometimes it was a little bit difficult to pick the priority between great social program, finishing tasks or getting to know people better. In the end it was usually the sleep that was cut short. Aside from having an interesting and good time, it was a great preparation for my time at the UMCG. When I moved here it was very nice to see some familiar faces, and got quite the starting help from some of them. Special thank you for that goes to Michiel de Boom and Tineke Kraij!

An inspiration was Arjen Petersen.

Dear Arjen, I always felt a bit like you are my work dad. My rather unbalanced personality you compensated for with your easygoingness. You helped me get set up, gave me a lot of valuable advice and made sure I had my energy fueled up during our long days. I hope we get to work together again. Your skills are impressive and you have such a good heart.

R1 Someone who very much impressed me and definitely rattled me in a very positive  
R2 way before I finally came here was Dr. Jochum Prop. Dear Jochum, thank you very  
R3 much for your support here in Groningen, but also for setting quite the example!  
R4

R5 As in Mannheim I could not have managed without the support and contributions  
R6 of Petra Ottens, Susanne Veldhuis, Janneke Wiersema-Buist, Douwe Samplonius,  
R7 Jacco Zwaangstra and Jelle Adelmeijer. All of you taught me new skills, helped me  
R8 improve my work and stayed patient when I bombarded you with questions. You  
R9 always gave me the feeling being part of the group, which I appreciate a lot.

R10 Dear Jacco, I want to thank you additionally for not only helping me extent the  
R11 amount of shoes in my closet to twice as many not allowing my high heels anymore.  
R12 But, you were also the leprechaun that wandered the hallways when I broke another  
R13 syringe to keep the experiments going or made speedy orders when I once more  
R14 forgot to order in time.

R15 Dear Jelle, our joined coffee adventures became a regular pleasure in my weekly  
R16 schedule. Over this you became a friend and someone whose advice I often searched.  
R17 Thank you for always taking the time and being supportive.

R18 Dear Petra and Susanne, thank you for your support in my projects and the patients  
R19 you bring along with the regular occupation of the OK. Special thanks for your  
R20 help particularly the last few months, I could not have done it the one or other time  
R21 without you.  
R22

R23 Also a big thank you goes to the students and fellow PhD students in the laboratory  
R24 of surgery. Some helped me a lot during the initial phase getting settled here in  
R25 Groningen and introducing me during a hallway Oktoberfest. Others joined me at  
R26 'Karneval' in Cologne, were great office roommates, helped me with my projects  
R27 or kept me entertained. Thank you Dr. Cyril Moers, Dr. Sanna op den Dries, Negin  
R28 Karimian, Dr. Golnar Karimian, Paria Mahboub, Anita Munneke, Dr. Astrid Klooster,  
R29 Edris Alkozai, Peter Bommel, Dr. Welmoet Westendorp, Dr. Michael Sutton, Freeha  
R30 Arshad, Ilsalien Bakker, Leon van Dullemen, Anne van Erp, Marjolein Leemkuil,  
R31 Rianne van Rijn, Alix Matton, Yuan He, Valerie Wiersma, Djoke Hendriks, Dr.  
R32 Maaïke van Werkhoven, Chanu Mohansingh, Wilma Potze, Anne Koning, Fernanda  
R33 Bomfati, Nyke de Vries, Shanice Karangwa, Tony Vijver, Simone Kleiss, Jurian  
R34 Kloeze (Master Sunshine) and Eric Decker.  
R35

R36 Greg Hugenholtz and Marc Kirschbaum, my most chaotic roommates, and Laura  
R37 had their hearts at the right spot.  
R38  
R39

Dear Greg, thank you for being a great friend and sending Celine, as my wing woman, out for drinks with me (though the reason you told me to go out was very different). The diversity of talks with you impressed me each time, you are missed. Dear Marc, aside from being my German connection, you were a good friend. I hope one day we share the coffees you owe me. Thanks for the many times you just were there!

Dear Laura, you are aside from being pure joy in the office an inspiration. I am still hoping I will find your happiness pills. You are quite the sunshine!

Andrie Westerkamp and Dr. Geert van Rijt, thank you for not only being great colleagues but also friends. It was a pleasure having coffee with you and having vivid discussions. I could always rely on you and hope you keep crossing my path.

Greatly appreciated Dr. Dafna Groeneveld! Dear Daphna, thanks to you I found a new place to live. But I also learned that you are the woman to ask for other tips and tricks to get around, or call for an emergency plan. Thank you for all the translations! You are always good for a surprise!

A big thank you I would like to express to Sophie Meyer.

Dear Sophie, you are such a kind and inspiring young woman. It is a great pleasure to know you! Thank you for being around and just saying what you are thinking! I hope we keep running into one another.

Grietje Lier, Jeske Bubberman and Judith van Zanden, thank you for helping out in the laboratory when a hand was needed. I enjoyed working with you and the enthusiasm you brought along.

My two colleagues, Dane Hoeksma, and Rolando Rebolledo, I would like to thank for the joined work on the comparative study.

Dear Rolando, I am very grateful for you, getting me started in the field of mitochondria. I will for sure never forget our first isolation day, enthusiastically trying to measure respiration and Henri telling us after an exhausting day that we only isolated mitochondrial proteins. At least we knew why it didn't work. There are many moments like this I will not forget, nor will the beers be forgotten that we had ...

I want to express my gratitude to a number of people helping me with projects, even though I showed mostly up unannounced. You made my live a lot easier. Thank you

R1 for your contributions to some of the projects in this thesis but also others waiting  
R2 to be continued, hopefully also with your support. These people are Prof. Dr. Jan  
R3 Luuk Hillebrands, Prof. Dr. Ton Lisman, Prof. Dr. Marco Harmsen, Prof Dr. Grietje  
R4 Molema, Dr. Matijs Meurs, Dr. Torsten Plösch, Dr. Irene Heijink, Daan Pouwels, Dr.  
R5 Jan Kaamps, Dr. Herman Silije, Wardit Tigchelaar, Dr. Marc Seelen, Dr. Niels t' Hart,  
R6 Jan Doff, Dr. Erik Verschuuren, Dr. Hans de Vries, Hans Burgerhof, Karolin Meyer,  
R7 Mojtaba Parvizi, Marian Bulthuis, Pathology Routine Laboratory, Rick Oosterhuis  
R8 and others from the UMCG Instrumentmakerij.  
R9

R10 A big thanks goes to a number of people in the CDP. Even though I 'borrowed'  
R11 things or took the whole hand when the finger was granted, they never complained.  
R12 Even though I also showed up unannounced. Thank you: Microsurgical team, Alex  
R13 Kluppel, Dr. Catriene Thuring, Miriam van der Meulen-Frank, Care taker and the  
R14 rest of the team.  
R15

R16 Without the help and support of Wanda Schut, Magda Munstra, Mareike Tjeerde,  
R17 Goos Knol, Riekje Banus and Sara Mangoendirjo-Setroikromo I would have been  
R18 many times lost in the administrative jungle of the UMCG, thank you for preventing  
R19 that, especially in such a positive way.

R20 Dear Wanda and Magda, thank you for your effort in any regard. I always enjoyed  
R21 the brief chats with you. I hope we still manage to have drinks together and if it is a  
R22 cup of coffee.  
R23

R24 I am very grateful for five friends that ensured my work/life balance as well as some  
R25 of them kept me in shape during the last years. Thank you for sticking in there and  
R26 not giving up on me: Nora Angleys, Angela Baumer, Annemarie Jäkel, Annefleur  
R27 Lurvink, and Carola Wanke.  
R28

R29 And last but not least I would like to thank my whole family for always being there,  
R30 helping me out and supporting me in so many ways.

R31 Dear mom and dad, thank you for providing me with so many opportunities and  
R32 chances in life! You let me go my own way and do my own mistakes. You encouraged  
R33 me to try new things and not to stagnate. I cannot thank you both enough for your  
R34 patience, effort and support to get me where I am today.

R35 Dear Markus, Vicci and Moritz, thank you for being such great siblings that I do not  
R36 deserve. Dear Markus and Vicci, thank you for always being there, taking me along  
R37 and helping me reach my goals! Dear Moritz, even though we have our differences  
R38 you are always around when I am in trouble to back me up, thank you!  
R39

Dear Moritz Brinkman and Hanna, thank you for your advice and support, as well as regularly accepting the chaotic me around. I am glad both of you became part of the family!

Dear Monica, thank you for being who you are as a person, as sister in law and as a great friend.

Dear Jetty, thank you for always being there and enabling a lot for me.

Dear Dickie and Schorlie, you are both hopefully at a better place now. Thank you for being great grandmothers and influencing my life in so many ways.
