RIJKSUNIVERSITEIT GRONINGEN

**LASER TREATMENT OF ALLOYS:
PROCESSING, MICROSTRUCTURE AND
STRUCTURAL PROPERTIES**

Proefschrift

ter verkrijging van het doctoraat in de
Wiskunde en Natuurwetenschappen
aan de Rijksuniversiteit Groningen
op gezag van de
Rector Magnificus, dr. F. Zwarts,
in het openbaar te verdedigen op
vrijdag 9 februari 2007
om 14.45 uur

door

Uazir Orion Bezerra de Oliveira

geboren op 30 september 1975
te Natal
Brazilië

Promotor: Prof. dr. J.T.M. De Hosson
Co-promotor: dr. V. Ocelik

Beoordelingscommissie: Prof. ir. L. Katgerman
Prof. dr. T.T.M. Palstra
Prof.dr. H. De Raedt

Laser Processing of Alloys: Processing, Microstructure and Structural Properties

U.O.B. de Oliveira

ISBN-10: 90-77172-23-8

ISBN-13: 978-90-77172-23-0

MSC PhD thesis series 2007-01

ISSN 1570-1530

Print: Ponsen en Looijen b.v., Wageningen

Cover: Microstructure of longitudinal cross section of laser deposited Co-based clad track revealed by [001] Inverse Pole Figure.

**Netherlands Institute
for Metals Research**

The work described in this thesis was carried out within the framework of the Strategic Research Program of the Netherlands Institute for Metals Research under project number **MC7.0211**

Contents

1 Introduction	1
2 Experimental techniques	4
2.1 Electron microscopy	4
2.1.1 Scanning electron microscopy	5
2.1.2 Electron Backscattered pattern microscopy	6
2.1.3 Transmission electron microscopy	7
2.2 The white light confocal microscopy	10
2.3 Mechanical testing	12
2.3.1 Vickers indentation hardness test	12
2.3.2 Wear dry sliding test	13
References	14
3 Laser surface engineering.	15
3.1 Laser surface engineering techniques	15
3.1.1 Laser transformation hardening and remelting of grey cast iron	16
3.1.2 Laser cladding	21
3.1.3 Characterization of Nd-YAG laser energy distribution	22
3.2 Laser hardening of grey cast iron	24
3.2.1 Experimental	24
3.2.2 Geometry of hardened tracks.	25
3.2.3 Characterization of hardened gray cast iron	26
3.2.4 Transformation hardening mechanism	30
3.2.5 Hardness characterization of laser hardened grey cast iron	32
3.3 Analysis of coaxial cladding process	34
3.3.1 Theoretical calculation of particle melt regime in the coaxial laser setup	35
3.3.2 Experimental on coaxial cladding process	38
3.3.3 Process map of coaxial cladding	41
3.4 Analysis of side cladding process	46
3.4.1 Experimental on side cladding process	46
3.4.2 Process map of side cladding	47
3.4.3 Application of a cladding processing map	49
3.5 Conclusions	51
References	53
4. Microstructure formation of laser deposited clad tracks	55
4.1 Introduction.	55
4.1.1 Cobalt based alloys	55
4.1.2 Solidification of alloys in dynamical process	56
4.2 Microstructure characterization of laser deposited clad tracks	58

4.2.1	Characterization of clad substrate interface	59
4.2.2	Phase analysis and characterization of bulk microstructure	60
4.2.3	Microstructure dependence with processing speed	63
4.2.4	Microstructure formation in the overlap area of laser clad layers	67
4.3	Tool steel clad layer deposition	69
4.3.1	Introduction: Fe-C-V system of tool steels	69
4.3.2	Microstructure analysis of a Fe-based clad layer	71
4.4	Conclusions	73
	References	75
5.	Residual stresses in laser clad layers	76
5.1	Introduction	76
5.1.1	Formation of residual stresses in laser clad layers	77
5.1.2	X-ray diffraction	77
5.1.3	Residual strain measurement with x-ray diffraction techniques	82
5.1.4	Calculation of stresses	86
5.2	Macrostress of surface finished clad layers	86
5.2.1	Materials and elastic constants	86
5.2.2	Biaxial strain measurement setup.	87
5.2.3	Characterization of surface stresses in cobalt based clad layer	88
5.2.4	Characterization of surface stresses in tool steel clad layer	90
5.3	Determination of macrostress profiles in cobalt based clad layers	91
5.3.1	Synchrotron strain measurement setup	91
5.3.2	Influence of parameters in residual strain measurements	92
5.3.3	Influence of laser cladding parameters on residual macrostress profiles	94
5.4	Microstress depth profile of individual grains determined by 3DXRD microscopy.	98
5.4.1	Residual microstrain measurement by 3DXRD microscopy	99
5.4.2	Residual stress results from 3DXRD microscopy measurement	100
5.4.3	Discussions and interpretation of residual microstress distribution	103
5.5	Conclusions	105
	References	107
6	Dry sliding properties of a laser deposited Co-based clad layer	109
6.1	Introduction.	109
6.2	Experimental methods.	110
6.2.1	Sample deposition and characterization	110
6.2.2	Wear tests	112
6.3	Worn surfaces	114
6.3.1	The influence of oxide layer in the wear behavior	116
6.4.	Conclusions	117
