ACKNOWLEDGEMENT

First of all I would like to express my sincere gratitude to my advisors Kasper F. Roszbach and Robert W. Lensink, for the support they provided in my Doctoral study and research, for their patience, motivation and their knowledge. Their guidance helped me in completing the dissertation.

I would also like to thank the rest of my thesis committee, Harald Benink, Panicos Demetriades and Roberto Wessels for their willingness to serve on the examining committee and take part in my dissertation.

My sincere thanks go to Nissan Liviatan, Moshe Kim, Yoram Landskroner, Meir Sokoler, and Yigal Menashe for their help, guidance and participation in the research and review of the thesis issues and hypotheses.

Last but not the least, I would like to thank my family—my wife Mira and my children Dana, Liron, Tal and Doron—for supporting me throughout my life.
