RIJKSUNIVERSITEIT GRONINGEN

# **Emission characteristics of water in the Universe**

Proefschrift

ter verkrijging van het doctoraat in de  
Wiskunde en Natuurwetenschappen  
aan de Rijksuniversiteit Groningen  
op gezag van de  
Rector Magnificus, dr. F. Zwarts,  
in het openbaar te verdedigen op  
vrijdag 26 oktober 2007  
om 16.15 uur

door

**Dieter Roel Poelman**

geboren op 22 februari 1980  
te Gent, België

Promotor:

Prof. dr. M. C. Spaans

Beoordelingscommissie:

Prof. dr. P. D. Barthel

Prof. dr. T. W. de Graauw

Prof. dr. E. F. van Dishoeck

ISBN: 978-90-367-3127-0

ISBN: 978-90-367-3128-7

(electronic version)

Voor opa Sijsele

The studies presented in this thesis were performed at the Kapteyn Astronomical Institute, department of the Faculty of Mathematics and Natural Sciences, University of Groningen, the Netherlands.

Financial support by the Netherlands Institute for Space Research (SRON), and travel support by the Leids Kerkhoven-Bosscha Fonds are gratefully acknowledged.

Printed by Optima Grafische Communicatie, Rotterdam.

# Contents

<b>Chapter 1: Introduction and outline</b>	<b>1</b>
1.1 The interstellar medium . . . . .	1
1.2 Formation and destruction routes of H <sub>2</sub> O . . . . .	2
1.3 Structure of the water molecule – spectroscopy . . . . .	5
1.4 Observational studies of water . . . . .	10
1.5 The thesis . . . . .	12
References . . . . .	13
<b>Chapter 2: <math>\beta</math>3D, a multi-zone escape probability code</b>	<b>15</b>
<i>Contains parts from Poelman, D. R., &amp; Spaans, M. 2005, A&amp;A, 440, 559-567</i>	
2.1 Introduction . . . . .	16
2.2 Radiative transfer: general . . . . .	17
2.3 Line transfer in a dusty medium . . . . .	19
2.4 Collisional rate coefficients . . . . .	23
2.4.1 Influence of different collisional rate coefficients . . . . .	24
2.5 Benchmarking the code . . . . .	25
2.5.1 H <sub>2</sub> O . . . . .	25
2.5.2 HCO <sup>+</sup> . . . . .	28
2.5.3 Conclusions . . . . .	31
References . . . . .	31
<b>Chapter 3: The excitation of water in the S140 region</b>	<b>33</b>
<i>Based on Poelman, D. R., &amp; Spaans, M. 2005, A&amp;A, 440, 559-567 and Poelman, D. R., &amp; Spaans, M. 2006, A&amp;A, 453, 615-620</i>	
3.1 Introduction . . . . .	34
3.2 The molecular cloud S140 . . . . .	35
3.3 Models . . . . .	37

3.3.1 Homogeneous PDR model . . . . .	37
3.3.2 Inhomogeneous PDR and EMC models . . . . .	41
3.4 Spherical embedded source models . . . . .	47
3.5 Line profiles . . . . .	50
3.6 Summary and discussion . . . . .	53
References . . . . .	55

**Chapter 4: The interpretation of water emission from dense interstellar clouds** **57**

*Poelman, D. R., Spaans, M., & Tielens, A. G. G. M. 2007, A&A, 464, 1023-1027*

4.1 Introduction . . . . .	58
4.2 Model description and results . . . . .	59
4.3 Discussion . . . . .	61
4.4 Astrophysical implications . . . . .	67
References . . . . .	68

**Chapter 5: Water line emission from the high-mass star-forming region AFGL 2591** **69**

*Poelman, D. R., & van der Tak, F. F. S., A&A submitted*

5.1 Introduction . . . . .	70
5.2 The high-mass star-forming region AFGL 2591 . . . . .	72
5.3 Model set-up . . . . .	73
5.4 Results . . . . .	75
5.4.1 Constant water abundance . . . . .	75
5.4.2 Water abundance jump profile . . . . .	76
5.4.3 Cavity . . . . .	80
5.4.4 Circumstellar disk . . . . .	83
5.4.5 Predictions for PACS . . . . .	84
5.5 Discussion . . . . .	86
5.5.1 Comparison to SWAS and ISO observations . . . . .	86
5.5.2 Parameter dependency . . . . .	87
5.6 Summary and conclusions . . . . .	90
References . . . . .	91

**Chapter 6: Detecting the snow-line: water emission from proto-planetary disks** **93**

*Meijerink, R., Poelman, D. R., Spaans, M., & Tielens, A. G. G. M., in preparation*

6.1 Introduction . . . . .	94
----------------------------	----

## CONTENTS

---

6.2	Disk model . . . . .	95
6.2.1	Disk structure . . . . .	96
6.3	Radiative transfer . . . . .	98
6.4	Results . . . . .	99
6.4.1	Rotational transitions . . . . .	99
6.4.2	Ro-vibrational transitions . . . . .	101
6.4.3	Line profiles . . . . .	110
6.5	Conclusions . . . . .	111
	References . . . . .	112
<b>Nederlandse samenvatting</b>		<b>115</b>
	Foton-gedomineerde gebieden . . . . .	117
	Massieve sterren . . . . .	117
	Schijven rond jonge sterren . . . . .	118
	De rol van Herschel . . . . .	119
<b>中文摘要</b>		<b>121</b>
	光子显著区 . . . . .	122
	大质量恒星 . . . . .	123
	环星盘 . . . . .	123
	卫星Herschel的目标 . . . . .	124
<b>Dankwoord</b>		<b>125</b>
