### Copyright

Other than for strictly personal use, it is not permitted to download or to forward/distribute the text or part of it without the consent of the author(s) and/or copyright holder(s), unless the work is under an open content license (like Creative Commons).

The publication may also be distributed here under the terms of Article 25fa of the Dutch Copyright Act, indicated by the "Taverne" license. More information can be found on the University of Groningen website: <https://www.rug.nl/library/open-access/self-archiving-pure/taverne-amendment>.

### Take-down policy

If you believe that this document breaches copyright please contact us providing details, and we will remove access to the work immediately and investigate your claim.

Downloaded from the University of Groningen/UMCG research database (Pure): <http://www.rug.nl/research/portal>. For technical reasons the number of authors shown on this cover page is limited to 10 maximum.

## 7.4 Curriculum Vitae

The author was born on 1 February 1976 in Groningen. In 1994 he finished secondary education at Gymnasium Ceeleum (grammar school) in Zwolle. In 2002 he obtained a Masters degree in Technical Computer Science at the University of Groningen, on the subject of the implementation of modular neural networks on reconfigurable chips. In 2003, the author became affiliated with the Groningen Bioinformatics Centre, Groningen University. Here, he performed a PhD project in the field of bioinformatics, specifically the development and application of statistical models for gene expression data, aiming to reveal genes that regulate complex traits. He obtained his PhD degree in June 2007.
