“A hundred times everyday I remind myself that my inner and outer life are based on the labours of other men, living and dead, and that I must exert myself in order to give in the same measure as I have received and am still receiving.”

– Albert Einstein

This thesis would not have been possible without the essential and gracious support of many individuals. First and foremost, I offer my sincere gratitude to Anna Hirsch, my PhD supervisor at the University of Groningen, whose daily guidance and support enabled me to expand my understanding and knowledge in the field of medicinal chemistry and dynamic combinatorial chemistry. Anna, thank you for giving me opportunity to work in your group. You took care of me since I arrived in Groningen both personally and scientifically. I still remember when I arrived in Groningen for the first time, you and Massimo welcomed me at the train station and brought me to the student house and helped me in getting settled in Groningen. Thanks for everything you did. Adri, my PhD co-supervisor, thank you for your useful suggestions especially in synthetic chemistry throughout the years. I never had imagined that I would have such polite and friendly PhD supervisors.

I would like to thank the members of my PhD reading committee, Prof. Gerard Roelfes, Prof. Alexander Dömling and Prof. Christopher Schofield, for their comments and feedback.

Thanks to Prof. Gerhard Klebe for our active and fruitful collaboration throughout my PhD. Thank you for listening to me patiently and explaining me enothiapepsin projects ongoing in your group, when I visited Marburg. Thank you Neli for showing me how to carry out X-ray crystallization experiments. I would also like to thank Ahyoung for explaining me how to perform the biochemical assay. Thank you Costas and Maria in Athens for showing your enthusiasm in STD NMR project. I learnt a very important and useful technique from you to analyze dynamic combinatorial libraries (DCLs). Hugo, it has been wonderful to work with you. Your insights in acylhydrazone chemistry and HPLC separation have been very helpful. You clarified all my doubts in HPLC analysis.

Tizi and Suresh, thanks for agreeing to be my paranymphs. Tizi, the past four years have been a wonderful journey with you. You were there in every step of my personal and scientific life in Groningen. Although we came from two completely different cultural backgrounds, we share the same thoughts; we understand each other better than the same cultural people from the same cultural background often do. I was amazed to see your enthusiasm about India, our culture, people, food, to be honest everything. It was wonderful to host you and Ugo in India. I really enjoyed your company. Thanks for hosting me in Italy and showing me around. Suresh (tamudu), you have been always amazing. I am grateful that you are always with me and we could share our sorrow and joy with each other all over the years. We know that a good chemist should be a good cook, and you are the perfect example of that. I always consider you as my younger brother.

There are many people, who helped me throughout these years in my research. Thanks to Martin, Wiktor, Jeffrey and Peter, you are always available to discuss my burning questions. Thank you Subrata Sir (my schoolteacher), because of you, I started to love chemistry and became passionate about it. I would like to thank my students Stephan, Peter, Alwin, Daphne and Matthijs for their dedication on the projects and trust in me. You really helped me to get more organized and to handle multiple projects in parallel. Thanks a ton Alwin, you are always there to translate my Dutch letters, to call the tax office and obviously, writing the Dutch summary of my thesis. Thanks to Matthijs, your enthusiasm for languages always amazed me. Because of you, I started to learn very basic Italian. Thanks to Theodora, Monique, Hilda and Alphons for yours technical and administrative assistance throughout these years. Thanks a lot to Pieter for assisting me in several NMR-based projects.

Zhongtao and Yange, it has been amazing to share an office with you in the first phase of my PhD. Zhongtao, your innocent jokes always make me happy. It was wonderful to share the lab with you as well. Jonas, it has always been nice to discuss with you about every aspect of life. I hope that you will come back to India once again and I will be happy to host you and show you around. It was nice to share an office with you. Thanks a ton for helping me in designing the cover page of my thesis.

Life in Groningen would not have been that happy and joyful without following people. Francesca, you have always been one of my dearest friends. It was wonderful to share so many things with you whenever we met, especially at the Borrel. I wish you and Richard all the best for your career and personal life. Ugo, you are one of the most polite persons I have ever met in my life. I will never forget our Indian and Italian tours together; hope many more will come soon. Thanks a lot to your astronomical experience, which increased my enthusiasm on sky gazing. Kiran (Kaka), you were always there with me when you were in Groningen and treated me as your younger brother. Your endless enthusiasm about research always motivated me. Adi, Ashoka, you guys were always amazing. You helped me in settling down in Groningen when I was very new here. Thanks for your company and frequent dinners at your place. I wish you all the best for your future career. Miri, Claudia, Felix, Julia, Manuel, Mathieu and Celine, you were so amazing throughout these years, I will not forget our immense discussion about Indian food, weather, etc. at the borrels and parties.

Thanks a lot Yagiz for our active and fruitful collaboration in protein-templated click chemistry project. Cati, Santi, Danny, Renata, Leti, Bea, Nick, Yun, Paul, Manathan, Michael, Zuzanna, Judy, Steven and Vasu, thank you guys for making the working atmosphere so nice and friendly. Varsha di, it was very relaxing to talk with you and share our stories during lunch and coffee breaks.

Life in Groningen would have been incomplete without participation in the GISA (Groningen Indian Student Association) and ZICS (Zernike International Cricket Stadium!!). GISA, thank you for giving me the opportunity to serve you for one year. I learnt a lot how to plan and organize work properly and finish on time. ZICS, without you every weekend would have been boring. Because of you, I had the opportunity to meet several international cricketers. Thanks Jacob, Ali, Afzal, Irfan, Javaid, Abdul and Brad for giving me company on every Saturday.

Finally, but most importantly, I would like to thank my family back home. Ma and Baba, your unwavering support and love have been the biggest strength for me. I cannot thank you enough for what you have done for me throughout the years. Thank you for having the courage to take difficult decision and being unhesitant to sacrifice anything in your “very” difficult time in order to see me, where I am today. Unfortunately, Baba, you did not wait long enough to share a bit of happiness. I am missing you badly. Please forgive me, if I have done anything wrong! Bhai, as I have been away from home for a long time, you took the responsibility to take care of family and allowed me to pursue my studies

and research in abroad. Thank you so much for everything you are doing. Chandrima, although we are living far from each other, your courage, enthusiasm and simplicity always motivated me. I am very blessed and lucky to have you in my life. Thank you so much for being with me.

Anyone, whom I missed to thank, was only due to over-sight. I beg your pardon and express my heartfelt gratitude for your support throughout the years.
