ACKNOWLEDGMENTS

One of the great pleasures when you have finished writing a book like this is to thank the many people who helped in different ways during the years of research. Although working on a dissertation is usually a solitary activity, for me it was, fortunately, a social one. Without the assistance of various people this book would not have turned out as it has. Needless to say, however, I remain solely responsible for the content of this work and any mistakes there may be.

I owe a tremendous debt to my supervisors Eibert Tigchelaar and Florentino García Martínez for their confidence, their help, suggestions, challenges, criticism, their time for and attention to all my questions, and for the many stimulating discussions. Eibert and Florentino, each in their own way, represent great examples for young scholars and I am fortunate and feel very proud to have had them as my teachers. I hope our friendship lasts *ad multos annos!*

The Faculty of Theology and Religious Studies in Groningen has been a wonderful place to work and I thank everyone for their support, especially my fellow PhD students and the staff at the faculty library and administration.

At Yale University I wish to thank John Collins, Eckart Frahm, Dale Martin, Matt Neujahr, and Michael Peppard for their interest in my work during our stay at the Divinity School in the spring of 2004. I thank John and Adela Collins for their hospitality and kindness towards us while we were at Yale.

My research has benefited from presentations on various occasions, but one especially has been very important. I wish to thank the Nordic Network in Qumran Studies, its board Torleif Elgvin and Hanne von Weissenberg, and all the participants during the Jerusalem symposium in September 2005 for the opportunity to present a paper, for the wonderful atmosphere, and a very special meeting. When I stayed at the École Biblique, Émile Puech was very kind to devote some of his time to discussing 4Q534.

I am most grateful to Professor Wolfgang Hübner for sharing his great knowledge of Hellenistic astrology with me and providing valuable suggestions over e-mail and for his willingness to read an early draft of Chapter Three. Wytse Keulen I thank for discussing the Greco-Roman physiognomic material during my presentation at the Ancient World Seminar in Groningen and afterwards, and for reading Chapter Two. I wish to thank Herman Vanstiphout (Stip) for reading the Babylonian physiognomic material in Chapter Two and discussing it with me. I thank Ton Hilhorst for improving my translation of Hephaestion, Jan Bremmer, the reading committee (Pieter van der Horst, Geurt-Henk van Kooten and Tobias Nicklas),

and Ed Noort for reading the entire manuscript at the end. Many thanks are due to Julia Harvey and Florian Bulens for quickly checking and improving the English of the entire manuscript and the Dutch summary respectively.

I wish to thank Francis Schmidt and Jonathan Ben-Dov for discussing over e-mail and in person various issues of ancient Jewish astronomy and astrology and Wout van Bekkum and Ronit Nikolsky for discussing the medieval Jewish physiognomic texts.

Finally, but above all, I thank my friends, family, and Annemieke ter Brugge.

Mladen Popović
