# ACKNOWLEDGMENTS

Before putting the word “end” to my PhD experience in Groningen, I want to acknowledge all the people that helped and accompanied me during these 4 years.

The first thing that you need to get a PhD is a promotor. It occurred to me to have two of them, and to both I extend my thanks. Maria, thanks for welcoming the former members of the MEPOS group into your own group and for allowing me to finish my PhD. I appreciated the effort that you put in managing the enlarged POE group after we merged. Paul, thank you for giving me the opportunity of starting my PhD here in Groningen.

My biggest thanks goes, doubtless, to my daily supervisor. Jan Anton, your help has been priceless for me. I have always found your door open whenever I needed, and discussions with you have always been enlightening. You taught me how to do research and how to present and defend my results; furthermore, you have always transmitted your enthusiasm to the whole group. I wish you all the best for your future career and personal life.

I would like to acknowledge my reading committee, Prof. K. Hummelen, Prof. R. Janssen and Prof. V. Dyakonov, for the time spent on my manuscript and for the useful comments that helped me to improve its quality.

Renate, Jan, Arjen, thank you for your administrative and technical help, you are really making life easier for people in our group!

My group members also played an important role during my PhD. It was a pleasure to work in friendly environments such as the MEPOS and then the POE groups; everyone contributed to these environments, and I would like to thank everyone for the support they gave me. In particular I want to thank the members of our small sub-group, Niels, Tejas, Solmaz, Azi, Nutifafa, Jian. A special thanks also goes to Gert-Jan, who besides being a valuable colleague has also been a good flatmate, to Kuik, who helped me

a lot to feel easy when I arrived, and to Davood, who shared the office with me during these four years.

Collaboration with people external to the group has been valuable and contributed a lot to my thesis and to my professional growth. Thomas, Gang, and Ryan, thanks for the collaborations and the fruitful discussions. Thanks to all the past and present members of the FOM focus group in Groningen; thanks to the Potsdam people, Dieter, Juliane, and Steffen, who collaborated with us for the fill-factor paper; and thanks to the people that participated with me in the DPI project, in particular to my fellows PhD students Charlie and Hans. I also acknowledge John van Hare and Frans de Schrijver for organizing all the review meetings.

Supervising students has been an interesting experience and it was a pleasure to see the results of their work. Irene, thank you for all the work that you have done in your master project, and thank you for being such a sociable person. Ron, Dima, Xinkai, thanks for your contributions during your short projects with me.

I enjoyed a lot doing my PhD in Groningen. Of course, part of the reasons that made this experience so enjoyable are outside the university. I had the luck to meet many awesome people here. Davide, you were one of the first people I met here, and one of my best friends. Thanks for helping me a lot to settle in Groningen, and for being such a good friend and neighbour. Kiryl, you accompanied me for all these four years, first as a flatmate and then as a good friend; thanks for all the time we spent together. Bouke, thanks for the translation of my summary in Dutch, and for all the evenings we spent watching movies or wandering in the city centre. Toni, Freddo, Serena, Igor, Marianna, Angela, Stefano, Santos, it was a pleasure to meet you all! Simone, thanks for your hospitality in Eindhoven. And thanks to all the friends from Italy who came to visit me here in Groningen or met me when I was back.

Dear Katya, I am sure that both my life and work have been improved by your presence. Thank you for being close to me.

Grazie alla mia famiglia. Mamma, papà, Mauro, grazie per essermi sempre stati vicino, nonostante la distanza, e per avermi sempre consigliato e rispettato in ogni mia scelta. Spero, con questa tesi e con qualsiasi cosa farò in futuro, di rendervi sempre orgogliosi di me.
