# Perceived Health Status after Kidney Transplantation

Proefschrift

ter verkrijging van het doctoraat in de  
Medische Wetenschappen  
aan de Rijksuniversiteit Groningen  
op gezag van de  
Rector Magnificus, dr. F. Zwarts,  
in het openbaar te verdedigen op  
maandag 4 december 2006  
om 14.45 uur

door

Jaroslav Rosenberger

geboren op 17 maart 1975

te Košice (Slowakije)

# Acknowledgements

Some years ago I met three scientists from the University of Groningen and they tried to persuade me to cooperate on research with them. They promised to teach me how to do the research, publish and consequently to prepare a PhD thesis. Thank you, Prof. Johan W. Groothoff, Prof. Wim J.A. van den Heuvel and Dr. Jitse P. van Dijk, for persuading me.

I would like to thank many more people as well. Firstly, I want to address my gratitude to all patients who participated in the study. This thesis is about perceived health status of patients with kidney disease, so without their contribution I would hardly be able to present anything.

From the University Medical Centre Groningen I would like to thank all the people at the Department of Social Medicine.

Dr. Jitse P. van Dijk, my co-promotor, is the main motor of co-operation between Kosice and Groningen. His help in my scientific development has been immense. His will to invest in research is astonishing and requires compliments. Only with his help was it possible to establish the Košice Institute for Society and Health (KISH) which now serves as the base for further research (not only) in the field of health in chronic diseases. Prof. Johan W. Groothoff, my promotor, played an important role at the start of the project and thereafter. I would like to express my thanks for the many important comments he gave me during my PhD study. I wish him as many successful PhD students as he can get. I have to thank my other promotor Prof. Wim J.A. van den Heuvel, the author of this project, for important comments concerning the conceptual framework of my thesis.

I would like to thank the members of the Promotion Board, Prof. Paul E. de Jong, Prof. K. van der Meer and Prof. Theo P.B.M. Suurmeijer, for their comments and discussion.

My colleague Sijrike F. van der Mei from Groningen is preparing for the defense of her PhD thesis about social participation in patients after kidney transplantation. I would like to thank her for the literature search at the beginning of the project and I wish her a lot of success in her scientific career. I want to thank Truus van Ittersum-Gritter for articles retrieval.

In Slovakia I would like to express my gratitude to all my colleagues who have supported me in my work.

Andrea Madarasova Geckova was my first supervisor in the field of public health, quality of life, statistics and methodology. I wish to express my gratitude to her for teaching me the first steps. Iveta Nagyova

has supervised my progress as well. I would like to thank her for her inspiring comments as well as for the lessons on methodology, statistics and quality of life. Robert Roland is my co-promotor and mentor in the field of nephrology and transplantation. I have learned many good habits from him. Some of the secrets of statistics were revealed for me by Assoc. Prof. Ivan Zezula and I would like to thank him for that.

Because the Košice Transplant and Dialysis center did not provide enough patients eligible for the study, I had to ask other nephrologists to help me with their patients. I would therefore like to express my gratitude to Viera Pribilincova, Katarina Pachova, Emilia Kardosova and Kvetoslava Mikulaninova. My special thanks are also addressed to Viera Lengyelova, Eva Nagyova, Melinda Ganyovicsova, Darina Drozdova, Viera Forgacova, Olina Harcarova, Monika Cupjakova, Karolina Kopcakova and Lucia Prihodova, who were responsible for data collection.

I wish to thank Andrew J. Billingham for his manuscript proof-reading and Claudia Jutkova for design of this book.

I would like to thank my colleagues from the Transplantation Department and Dialysis and Nephrology Center Fresenius Beata Grejtovska, Vladimir Gombos, Luboslav Bena and Alfonz Jurcina for their tolerance.

I am very thankful to Ivana Majerova for her excellent management at the Košice Institute for Society and Health. In addition, my thanks go to all members of KISH, namely Assoc. Prof. Olina Orosova, Zuzana Katreniakova, Maria Bacikova, Ferdinand Salonna, Maria Sarkova, Maria Humenikova, Ondrej Kalina, Tatiana Dubayova, Martina Chylova, Eva Havlikova, Miriam Polanova, Zuzana Skodova, Adriana Sudzinova, Daniela Ondusova, Maria Majernikova.

Last but not least I would like to thank my family and friends for their support. I would like to express special thanks to my mother, brother and wife Helena.
