Contents

Introduction to this thesis	9
Part I: Pathophysiology	15
Chapter 1 Clinical impact of vasomotor function assessment and the role of ACE-inhibitors and statins <i>Vascul Pharmacol</i> 2005;42(3):125-40	17
Chapter 2 Vascular responsiveness to angiotensin II predicts long-term prognosis in patients undergoing coronary artery bypass grafting <i>Hypertension</i> 2004;44(6):930-4	41
Chapter 3 Vascular function and mild renal impairment in stable coronary artery disease <i>Arterioscler Thromb Vasc Biol</i> 2006;26:379-84.	53
Chapter 4 Usefulness of preoperative C-reactive protein and soluble intercellular adhesion molecule 1 levels for predicting future cardiovascular events after coronary artery bypass grafting <i>Am J Cardiol</i> 2006;97:1697-701	65
Chapter 5 Effects of C-reactive protein and cholesterol on responsiveness in vitro of the internal thoracic artery to angiotensin II in patients having coronary artery bypass grafting <i>Am J Cardiol</i> 2006; in press.	75
Chapter 6 Telomere length of circulating leukocytes is decreased in chronic heart failure	83
Part II: Pharmacological interventions	95
Chapter 7 Effect of intensive versus moderate lipid lowering on endothelial function and vascular responsiveness to angiotensin II in stable coronary artery disease <i>Am J Cardiol</i> 2005;96:1361-4	97
Chapter 8 Increase in C-reactive protein after withdrawal from 4 years of statin therapy	105
Chapter 9 Rosuvastatin attenuates angiotensin II induced neointimal formation after stent implantation in the rat	115

Chapter 10	Statins in the treatment of chronic heart failure:	
10.a	a systematic review <i>PLoS Med</i> 2006; in press.	127
10.b	biological and clinical considerations <i>Cardiovasc Res</i> 2006; in press.	147
	Summary and future perspectives	167
	Samenvatting en toekomstperspectief	175
	Dankwoord	183
	Bibliography	189
