Balance between Herpes Viruses and Immunosuppression after Lung Transplantation

Studies on Epstein-Barr virus and Cytomegalovirus

E.A.M. Verschuuren

Verschuuren, E.A.M.

Balance between Herpes Viruses and Immunosuppression after Lung Transplantation

Thesis Groningen - with references - with summary in Dutch

Publication of this thesis was financially supported by:

ABN/AMRO, Acthelion, Astellas, Novartis, Roche, Wyeth, Guide

Cover: EBV Antigenemia of a lung transplant patient, or a result of a clumsy clinician in the laboratory causing a huge artefact. EBNA-1 = red, CD20 = green, nucleus = blue.

Printed by: Gildeprint, Enschede, the Netherlands

ISBN 90-367-2869-X

ISBN 90-367-2870-3 digital version

Contents

<i>Chapter</i>	<i>Title</i>	<i>Page</i>
1	Aim and outline of this thesis.	9
2	Towards standardization of the human Cytomegalovirus antigenemia assay.	19
3	Effects of changing immunosuppressive regimen on the incidence, duration and viral load of Cytomegalovirus infection in renal transplantation: a single center report.	35
4	Direct quantification of human Cytomegalovirus immediate-early and late mRNA levels in blood of lung transplant recipients by competitive nucleic acid sequence-based amplification.	51
5	Expression dynamics of human Cytomegalovirus immune evasion genes US3, US6, and US11 in the blood of lung transplant recipients.	73
6	Quantitative Epstein-Barr virus (EBV) Serology in Lung Transplant Recipients with primary EBV Infection and/or Post Transplant Lymphoproliferative Disease.	93
7	Dynamics and function of anti Epstein-Barr virus and anti Cytomegalovirus immune responses in the transplant patient: implications for immunosuppression.	111
8	Frequent monitoring of Epstein-Barr virus DNA load in unfractionated whole blood is essential for early detection of Post Transplant Lymphoproliferative Disease in high risk patients.	133
9	Treatment of Post-Transplant Lymphoproliferative Disease (PTLD) with Rituximab: the Remission, the Relapse and the Complication.	153
10	Epstein-Barr virus reactivation and lung transplant dysfunction.	165
11	Low rate of Bronchiolitis Obliterans Syndrome following Pre-emptive treatment of Post-Transplant Lymphoproliferative Disease after Lung Transplantation.	183

12	Epstein-Barr virus-DNA load Monitoring Late after Lung Transplantation: A surrogate Marker of the Degree of Immunosuppression and a Safe Guide to Reduce Immunosuppression.	203
13	Summary and future perspective.	223
	Nederlandse samenvatting	231
	Dankwoord	235
	Curriculum Vitae	239
	List of publications	241
