**university of  
 groningen**

**In vitro studies on the cytoprotective properties of  
 Carbon monoxide releasing molecules and N-acyl  
 dopamine derivatives**

**PhD thesis**

to obtain the degree of PhD at the  
 University of Groningen  
 On the authority of the  
 Rector Magnificus Prof. E. Sterken  
 and in accordance with  
 the decision by the College of Deans.

This Thesis will be defended in public on

Wednesday 2 March 2016 at 12:45

by

**Eleni Stamellou**

born on 14<sup>th</sup> September, 1984

in Athens, Greece

Promoters: Prof. Dr. Willem J van Son  
Prof. Dr. Benito A. Yard

Copromoters: Prof. Dr. Mathias Hafner  
Dr. Marc Seelen

Assessment committee: Prof. Dr. H-P. Hammes  
Prof. Dr. Rob Henning  
Prof. Dr. Tammo Ostendorf

Paranimfen:

Prama Pallavi

Anna-Maria Bellou

## ***Contents***

<b>CHAPTER 1</b> .....	11
General Introduction and aim of the Thesis .....	12
<b>CHAPTER 2</b> .....	21
Carbon monoxide: Friend and Foe .....	21
<b>CHAPTER 3</b> .....	28
N-acyl dopamine derivatives as lead compound for implementation in transplantation medicine. ....	29
<b>CHAPTER 4</b> .....	41
Enzyme-triggered CO-Releasing Molecules (ET-CORMs): evaluation of biological activity in relation to their structure .....	41
<b>CHAPTER 5</b> .....	67
a. Acyloxy-diene-Fe(CO) <sub>3</sub> Complexes with variable chain lengths .....	77
b. Iron Dienylphosphate Tricarbonyl Complexes .....	83
<b>CHAPTER 6</b> .....	89
Different design of Enzyme-triggered CO-releasing molecules (ET-CORMs) reveals quantitative differences in biological activities in terms of toxicity and inflammation. ....	89
<b>CHAPTER 7</b> .....	113
N-octanoyl dopamine transiently inhibits T cell proliferation via G1 cell cycle arrest and inhibition of redox dependent transcription factors .....	113
<b>CHAPTER 8</b> .....	137
N-octanoyl dopamine treatment of endothelial cells induces the unfolded protein response and results in hypometabolism and tolerance to hypothermia .....	137
<b>CHAPTER 9</b> .....	163
Analyses of different synthetic N-acyl dopamine derivatives reveal different structural requirements for their anti-inflammatory effect and TRPV1 activation .....	163
<b>Chapter 10</b> .....	187

Summary.....	188
Conclusion and future perspectives .....	193
<b>APPENDIX</b> .....	197
Author affiliations .....	198
Acknowledgements .....	201
Publication List.....	203
References .....	205
