Teresa Gonzalo Lázaro was born on 29th October 1977 in Madrid, Spain. She grew up in Madrid and attended secondary and high school there.

In September 1995 she started as a student of Pharmacy in Universidad de Alcalá, Madrid. In the summer of 1998, she went to Iowa, EEUU, to do a practicum in a pharmacy office organized by the International Pharmaceutical Students Federation (IPSF). In the period 1999-2000, she got a research grant to study the *relationship between aggressive behaviour and the serotonin in humans* at the Department of Pharmacology, under the supervision of Dr. Betés. In the last year of her studies, she went to the Netherlands to work on a research project dealing with *targeting genes to ovarian carcinoma cells using lipoplexes* under the supervision of Dr. Gerben Koning and Prof. Dr. Gert Storm, Department of Pharmaceutics at the University of Utrecht. She graduated from Universidad de Alcalá in September 2001 with a Master's degree in Pharmacy.

In October 2001, she started a short research project dealing with *TAT-mediated uptake of liposomes by ovarian carcinoma cells* in the Department of Pharmaceutics at the University of Utrecht under the supervision of Dr. Gerben Koning, Dr. Enrico Mastrobattista and Prof. Dr. Gert Storm.

In September 2002, she started as a PhD student in the Department of Pharmacokinetics and Drug Delivery at the University of Groningen, under the supervision of Dr. Robbert Jan Kok, Prof. Dr. Ingrid Molema, Prof. Dr. Dick Meijer and Prof. Dr. Klaas Poelstra. During the spring of 2005 she was a visiting student at the IDIBAPS institute in Hospital Clínic in Barcelona, Spain, under the supervision of Dr. Ramón Bataller. The results of her research project are presented in this thesis book.
