Copromotor : Dr. Ir. J. Slomp

Beoordelingscommissie : Prof. dr. J. Wijngaard

Prof. dr. M.P. de Looze

Prof. dr. Gursel Suer

ACKNOWLEDGEMENTS

First of all, I wish to thank my supervisors, Eric Molleman and Jannes Slomp. They have been very patient, helpful, and supportive over all these years. Eric is very logic in terms of being able to see things through and grasp the main ideas from a lot of information. Jannes is very enthusiastic and creative. Together they make a wonderful team.

I especially appreciate the help from Durk-Jouke van der Zee. He offered me a lot of advices in simulation and in the writing of my thesis. In addition, I would like to thank the many colleagues who supported me in one way or another, especially the ones in the Production System Design group.

I wish to thank the members of the reading committee, Prof. dr. J. Wijngaard, Prof. dr. M. P. de Looze, and Prof. dr. Gursel Suer for their willingness to read my thesis, and for their valuable and constructive comments.

My friends in Groningen have made my stay very pleasant. I will preserve the memories of numerous parties, barbecues, trips, and sports sessions, and all the happy time that we spent together.

Finally, I would like to express my gratitude to my family members. They always respect my choices, and have always been tolerant, understanding, and encouraging.

Hong Yue
Groningen, April 2005

TABLE OF CONTENTS

Chapter 1	Introduction	1
1.1	Worker flexibility issues.....	2
1.2	DRC contexts.....	4
1.3	Worker flexibility in a DRC parallel shop.....	5
1.4	Worker flexibility in a DRC assembly line.....	5
1.5	Overview.....	6
Chapter 2	Literature review and experimental design	7
2.1	Extension of Nelson’s model.....	7
2.1.1	Nelson’s model.....	7
2.1.2	Environmental dynamics and worker flexibility.....	10
2.1.3	Learning and forgetting.....	12
2.1.4	Individual differences.....	13
2.2	Cross training issues.....	16
2.2.1	Level of cross training.....	16
2.2.2	Degree of Chaining.....	17
2.3	Experimental design.....	18
2.3.1	Experimental factors.....	18
2.3.2	Simulation model.....	21
2.3.3	Performance criteria.....	24
2.4	Summary of Chapter 2.....	25
Chapter 3	Results	27
3.1	The impact of part type repetitions and the individual learning patterns.....	27
3.1.1	Hypotheses.....	29
3.1.2	Experimental design.....	33
3.1.3	Results.....	37
3.1.4	Discussion and conclusions.....	51

3.2	Cross training and chaining.....	52
3.2.1	Level of cross training.....	52
3.2.2	Degree of chaining.....	60
3.3	Summary of Chapter 3.....	66
Chapter 4 Worker flexibility in a DRC assembly line.....		69
4.1	Introduction.....	69
4.2	Problem context and motivation.....	73
4.3	Literature review and research questions.....	75
4.3.1	Level of cross training.....	75
4.3.2	Chaining.....	76
4.3.3	Worker deployment rules.....	79
4.3.4	Station-to-worker ratios.....	80
4.3.5	Research questions.....	81
4.4	Methodology.....	82
4.4.1	Simulation model.....	82
4.4.2	Experimental design.....	84
4.4.3	Simulation experiments.....	93
4.5	Results.....	93
4.5.1	Level of cross training.....	94
4.5.2	Degree of chaining.....	101
4.5.3	Worker deployment rules.....	110
4.5.4	Station-to-worker ratios.....	116
4.6	Discussion and conclusions.....	123
Chapter 5 Conclusions and discussion.....		127
5.1	Worker flexibility in a DRC parallel shop.....	127
5.2	Worker flexibility in a DRC assembly line.....	130
References.....		134

Appendix : Literature review on learning and forgetting moel.....	138
1 Learning.....	138
2 Forgetting.....	139
3 Comparison of models.....	141
4 LFL model of Carlson and Rowe (1976).....	142
Summary (English).....	145
Samenvatting (Dutch).....	152
