## CONTENTS

Figures	8	
Tables	9	
<b>1</b>	<b>Introduction, old firms in the Netherlands</b>	<b>11</b>
1.1	Introduction	11
1.2	The research field	12
1.3	Research goal and questions	15
1.4	Research layout	16
1.5	Research methods	17
<b>2</b>	<b>Old firms: a practical definition and a current state of affairs</b>	<b>21</b>
2.1	Introduction	21
2.2	The firm defined; theoretically and statistically	22
2.2.1	Theoretical considerations	23
2.2.2	Statistical agencies	28
2.2.3	Definition of the firm	30
2.3	Old in the context of the firm	31
2.3.1	Age as a measuring instrument	31
2.3.2	A practical definition of old firms	32
2.4	Search for data	35
2.5	Old firms in the Netherlands in 2000	38
2.5.1	Absolute distribution of old firms	39
2.5.2	Relative distribution of old firms	41
2.5.3	Age distribution of firms	43
2.5.4	Sectoral distribution of old firms	45
2.6	Concluding remarks	48
<b>3</b>	<b>Historical development of Dutch trade and industry, from 1820 till 2000</b>	<b>51</b>
3.1	Historical perspective	51
3.1.1	Pre-industrial period	52
3.1.2	Industrial revolution	54
3.1.3	Second industrial revolution or modern capitalism	58
3.2	Development of trade and industry by sectors and size	60
3.2.1	Data from the 19 <sup>th</sup> century	60
3.2.2	Data from the 20 <sup>th</sup> century	62
3.2.3	Analysis over time	63

3.3	Spatial distribution of industry	67
3.4	Concluding remarks	83
<b>4</b>	<b>Organizational ecology and industrial organizations; frameworks for path dependency and lock-in of old firms</b>	<b>85</b>
4.1	Introduction	86
4.2	An evolutionary view on development and survival of firms	87
4.2.1	Industrial organization theory	87
4.2.2	Organizational ecology theory	88
4.2.3	Density model of competition and legitimation	89
4.2.4	Liabilities and aging firms	92
4.2.5	Adaptation, selection and structural inertia in old firms	93
4.3	Path dependency in explaining the survival of old firms	97
4.3.1	Path dependency: an introduction	98
4.3.2	Path dependency in organizational ecology and industrial organization theories	101
4.3.3	Age, inertia & historical lock-in: path dependent?	102
4.3.4	Spatial path dependence	104
4.4	Spatial implication of the evolutionary view on old firms	106
4.4.1	Variables in long-term survival	106
4.4.2	Hypotheses for testing	116
4.5	Concluding remarks	116
<b>5</b>	<b>The survivors: golden oldies?</b>	<b>119</b>
5.1	Introduction	119
5.2	Characteristics of old firms in the survey	120
5.2.1	Analysis of survey	120
5.2.2	Identities of old firms	131
5.3	Spatial firm histories	133
5.3.1	Sixteen small spatial firm histories	134
5.3.2	Takeover, subsidies and history influencing survival	144
5.4	Spatial distribution of some groups of old firms	147
5.4.1	Spatial distribution of five manufacturing sectors	149
5.4.2	Adverse environment – a section tool?	157
5.5	Concluding remarks	158
<b>6</b>	<b>Confrontation between old and younger firms, are they really different?</b>	<b>161</b>
6.1	Introduction	161
6.2	Relocation and age of firms	162
6.3	Firms and locational inertia	164
6.3.1	Site and situation	165

6.3.2	Size, market and innovation	168
6.4	Relocation history modelled	172
6.5	Old and younger firms' identities	175
6.6	Discussion and concluding remarks	178
<b>7</b>	<b>Corporate identity and image of old firms</b>	<b>183</b>
7.1	Introduction	183
7.2	Identity versus image	184
7.2.1	Corporate identity	185
7.2.2	Corporate image	187
7.2.3	The 'wished identity' and image	189
7.3	Determinants of corporate identity	190
7.3.1	Place and age in corporate identity	191
7.3.2	Identities of old firms	193
7.3.3	Expectations and connection hypotheses	194
7.4	Content analysis	195
7.4.1	Websites as a marketing tool	195
7.4.2	Method and coding scheme	197
7.4.3	Results of content analysis	200
7.4.4	Continuous versus changed identity	204
7.5	A trustworthy identity: a tool for survival?	205
7.6	Concluding remarks	206
<b>8</b>	<b>Summary and conclusion</b>	<b>209</b>
8.1	Introduction: the research set-up	209
8.2	Old firms in the Netherlands: a recapitulation	211
8.3	Spatial behaviour of old firms	213
8.4	Old firms' identities	214
8.5	Discussion	215
8.6	Conclusions	216
8.7	Demography of firms: contemporary findings	218
8.8	Research implications	220
	Samenvatting	223
	Bibliography	231
	Appendices	245
	Acknowledgement	267

## FIGURES

1.1	Research layout and reading guide	17
1.2	Methods applied within this research	19
2.1	Organization of businesses by the Dutch Bureau of Statistics	29
2.2	Present location of old firms in the Netherlands	40
2.3	Percentage of old firms per province, present location	41
2.4	The residual figures for the share of old firms in the provinces of the Netherlands	43
2.5	Age-pyramids of firms in the Netherlands	44
3.1	Structure of labour force in 1514 in Noord and Zuid Holland in percentages	53
3.2	GDP per sector as a percentage of the annual GDP in the Netherlands	58
3.3	Most important industrial manufacturing groups per province, based on the absolute number of firms and factories in 1820	69
3.4	Most important industrial manufacturing groups per province, based on the absolute number of firms and factories in 1858	70
3.5	Most important industrial manufacturing groups per province, based on descriptive information of different factories in 1874	72
3.6	Most important industrial manufacturing groups per province, in 1888-1890, based on the absolute number of firms and factories with more than 10 employees and/or a power engine	73
3.7	Most important industrial manufacturing groups per province, based on employees per municipality in the concerning manufacturing groups in the period 1906-1912	75
3.8	Most important industrial manufacturing groups per province based on the absolute number of firms and establishments of firms and factories in 1930	76
3.9	Most important sectors (first level) and most important industrial manufacturing groups (second level) based on the absolute number of establishments in 1950	78
3.10	Most important sectors (first level) and most important industrial manufacturing groups (second level) based on the absolute number of establishments in 1963	79
3.11	Most important sectors (first level) and most important industrial manufacturing groups (second level) based on the absolute number of establishments in 1978	81
3.12	Most important sectors (first level) and most important industrial manufacturing groups (second level) based on the absolute number of establishments in 2001	82
4.1	Founding and mortality rates according to the density dependence model	91
4.2	Path dependency when initial conditions favoured B	101
5.1	Relative size-distribution of firms in the Netherlands in number of employees	122

5.2	Percentage of relocated establishments in the Netherlands, per age cohort	123
5.3	Percentage of relocation in size distribution of old firms	125
5.4	Percentage of relocation at different ages of old firms	125
5.5	Sector and product continuity in percentage of the population of old firms and as percentages of the sector	128
5.6	Percentage of firms per sector with and without a foreign establishment	130
5.7	Absolute number of diverse elements why firms have the same or a changed identity	132
5.8	Promotion poster	135
5.9	The STORK school and in the background one of the factory's chimneys in Hengelo	147
5.10	The outside of the STORK factory in Hengelo	147
5.11	The spatial distribution of firms in the 'book and stone printing' manufacturing group at their 2001 location	150
5.12	The spatial distribution of firms in the 'construction' manufacturing group at their 2001 location	153
5.13	The spatial distribution of firms in the 'metal construction' manufacturing group at their 2001 location	154
5.14	The spatial distribution of firms in the 'shipbuilding & other vehicles' manufacturing group at their 2001 location	155
5.15	The spatial distribution of firms in the 'foodstuffs & beverages' manufacturing group at their 2001 location	157
6.1	Relative importance of identifying elements	177
7.1	Framework of used terms and their relationships	190
7.2	Relative importance of the different identifying elements	194
7.3	Example 1 of website in content analysis	199
7.4	Example 2 of website in content analysis	199
7.5	Example 3 of website in content analysis	200
7.6	Score per element on websites	201
7.7	Relative frequency of elements in all websites in relation to the total number of sentences and pictures per website	202
7.8	Relative frequency of elements on websites of firms with a changed versus a continuous identity	204
8.1	Path dependency and location of old firms	218

## **TABLES**

2.1	Relative spatial distribution of old firms over the Netherlands	42
2.2	Sectoral division of old firms over the provinces in absolute numbers	46
2.3	Manufacturing groups in absolute number of firms in 2001	47
2.4	Absolute number of old firms for each manufacturing group	48
3.1	Percentage of workers employed in the industrial sectors	57
3.2	The Dutch labour force since 1899 per sector in percentages of total	

	workforce	59
3.3	Number of factories in 1853, 1859 and 1874	61
3.4	Percentages of firms per sector in the period 1820-2001	65
3.5	Labour force in manufacturing industry per province in the period 1889 – 1978	66
3.6	Percentages of firms in four sectors in the period 1899 - 1978	67
5.1	Old firms characteristics	121
5.2	Results of old firms' takeovers and their influence on survival in absolute numbers	144
5.3	Results of old firm's subsidies and their influence on survival in absolute numbers	145
5.4	Results of old firm's disruptive periods in history in absolute numbers	146
5.5	Personnel facilities old firms have or had in their past	146
5.6	Importance of major cities in number of inhabitants in city hierarchy in the Netherlands in 1600, 1795 and 1900	151
5.7	Conclusions and accepted hypotheses of Chapter 5	159
6.1	Results of questionnaires for type of location for all firms, the group of old firms and the group of younger firms in percentages	166
6.2	Cross tabulation of on site expansion with age in groups	167
6.3	Correlations premises and locational adaptation	168
6.4	Correlations in market relationships	170
6.5	Correlations between age, relocation and other variables	171
6.6	Empirical results logit analysis	173
6.7	Conclusions and accepted hypotheses of Chapter 6	180
7.1	Examples of measuring 'image-elements' with website content analysis	198
7.2	Correlations between the various elements on the websites	203
