Chapter 8

It is finished!

The process of earning a PhD (and writing a dissertation) is a long and arduous endeavor that is certainly not an individual experience; rather it takes place in a collective context and includes various persons, whom I would like to thank sincerely.

Foremost, I would like to express my deepest gratitude to my promoter Prof. Harold Snieder for being a 'promotor extraordinaire', for his unstinting support, guidance and enthusiasm throughout my PhD. In addition, I would like to extend my thanks to my co-promotor Dr. Ilja Nolte who offered patience, direction and motivation. Without their mentorship and expertise, this PhD project would not have been completed. I could not have imagined better (co-)promotors and mentors for the past three and half years!

Besides my advisors, I would like to thank the assessment committee: Prof. Yanbin Dong, Prof. Eco de Geus, and Prof. Pim van der Harst. Thank-you for your effort in adjudicating my thesis. I am honored to have you read my thesis and to be on my assessment committee.

I would also like to thank my colleagues in the unit of genetic epidemiology & bio-informatics. It has been a pleasure to work with you on some joint projects.

I would be remiss to not thank my two office roommates (and paranimfen), Jisca Kuiper and Marloes Oldenkamp. Your camaraderie, support and our great chats have made this whole undertaking a more enjoyable one. Thank you for your friendship! I look forward to reading your next paper(s) in The Lancet 😊

Last but not least, I would like to thank my family for all their support. Como dice El Con-dorito: plop!
