From early life environment to epigenetics
 and childhood overweight

PROEFSCHRIFT

ter verkrijging van de graad van doctor aan de
 Rijksuniversiteit van Groningen
 op gezag van de
 rector magnificus prof. dr. E. Sterken
 en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op
 woensdag 18 mei 2016 om 16:15 uur

door

Leanne Karen Küpers
 geboren op 5 april 1987
 te Winterswijk

PROMOTORES

Prof. dr. H. Snieder

Prof. dr. R.P. Stolk

COPROMOTOR

Dr. E. Corpeleijn

BEOORDELINGSCOMMISSIE

Prof. dr. G.J. Navis

Prof. dr. C.L. Relton

Prof. dr. O.H. Franco

PARANIMFEN

Susanne Tielemans

Anne Looijmans

CONTENTS

Chapter 1	General introduction	9
-----------	----------------------	---

PART I – DNA METHYLATION AND CHILDHOOD WEIGHT STATUS

Chapter 2	DNA methylation mediates the effect of maternal smoking during pregnancy on birth weight of the offspring	27
Chapter 3	Maternal smoking in pregnancy and DNA methylation in newborns: Genome-wide consortium meta-analysis	71
Chapter 4	Cord blood DNA methylation and birth weight: a meta-analysis of epigenome-wide association studies	203
Chapter 5	QCEWAS : a software package for automated quality control of results of epigenome-wide association studies	233

PART II – INFANT LIFESTYLE AND CHILDHOOD WEIGHT STATUS

Chapter 6	Determinants of weight gain during the first two years of life	251
Chapter 7	Skipping breakfast and overweight in two and five year old Dutch children	279
Chapter 8	Dietary habits in toddlers predict accelerated growth between two and six years of age	289
Chapter 9	Parental physical activities are associated with directly measured physical activity in young children	313
Chapter 10	General discussion	331
Chapter 11	Summary	347
	Nederlandse samenvatting	351
	About the author	355
	Other SHARE dissertations	360
	GECKO Drenthe collaborators	362
	Dankwoord	363
