STELLINGEN BEHORENDE BIJ HET PROEFSCHRIFT:

INTERACTIONS OF CELL DIVISION PROTEIN FTSZ WITH LARGE AND SMALL MOLECULES

1. SepF exclusively binds to the C-terminus of FtsZ.
2. The C-terminus of FtsZ is a landing pad for most FtsZ binders.
3. Buffer compositions are crucial for FtsZ studies. One small factor may totally spoil the whole experiment.
4. Solubility of a chemical compound is the first factor to be determined before starting experiments.
5. Doing science teaches one the truth of the Bible verse: "Test everything. Hold on to what is good". 1Th, 5:21
6. The things you are passionate about are not random. They are your calling. *Fabienne Fredrickson*
7. "If you want to make God laugh, tell Him about your plans." This quote from Woody Allen usually does not apply to research but often applies to a real life.
8. Finding a proper work-life balance is something we have to learn quickly. Children are a very good help in finding the balance.
9. Coping with pangs of guilt is the most difficult part of a working mother's life.
10. Children are our future. There is no future without children.
11. Do what is right. Not what is easy. *Nick Vujicic*
